

Enabling Hydrogen Transitions

National Energy Technology Laboratory

NETL Hydrogen Activities

- **Relational Database Established**
- **Lessons Learned Archive**
- **Implementation Risk Management**
- **Actuarial Data For Insurability**
- **Regulatory Compliance Cost Analysis**
- **Safety Certification Process**

Working to connect today's energy infrastructure with hydrogen energy's potential.

Engineering the Coal-to-Hydrogen Pathways

H₂ Fueling Stations in PA & WV

Developing Fuel Cells to provide reliable electrical power.
