**FY 2010
PROGRESS REPORT FOR THE
DOE HYDROGEN PROGRAM**

February 2011
DOE/GO-102011-3178

Approved by Sunita Satyapal, Hydrogen Program Manager

NOTICE

This report was prepared as an account of work sponsored by an agency of the United States government. Neither the United States government nor any agency thereof, nor any of their employees, makes any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States government or any agency thereof. The views and opinions of authors expressed herein do not necessarily state or reflect those of the United States government or any agency thereof.

Available electronically at <http://www.osti.gov/bridge>

Available for a processing fee to U.S. Department of Energy and its contractors, in paper, from:

U.S. Department of Energy
Office of Scientific and Technical Information
P.O. Box 62
Oak Ridge, TN 37831-0062
Phone: (865) 576-8401
Fax: (865) 576-5728
E-mail: <mailto:reports@adonis.osti.gov>

Available for sale to the public, in paper, from:

U.S. Department of Commerce
National Technical Information Service
5285 Port Royal Road
Springfield, VA 22161
Phone: (800) 553-6847
Fax: (703) 605-6900
E-mail: orders@ntis.fedworld.gov
Online ordering: <http://www.ntis.gov/ordering.htm>

Printed on paper containing at least 50% wastepaper, including 20% postconsumer waste

Table of Contents

I.	Introduction	1
II.	Hydrogen Production	17
II.0	Hydrogen Production Sub-Program Overview	19
II.A	Distributed BDL Production	23
II.A.1	Ohio State University: Investigation of Reaction Networks and Active Sites in Bio-Ethanol Steam Reforming over Co-based Catalysts	23
II.A.2	Pacific Northwest National Laboratory: Distributed Hydrogen Production from Biomass Reforming	29
II.A.3	Argonne National Laboratory: Hydrogen from Glycerol: A Feasibility Study	34
II.A.4	National Renewable Energy Laboratory: Distributed Bio-Oil Reforming	38
II.A.5	Argonne National Laboratory: Distributed Reforming of Renewable Liquids Using Oxygen Transport Membranes	42
II.B	Biomass Gasification	46
II.B.1	United Technologies Research Center: A Novel Slurry-Based Biomass Reforming Process	46
II.B.2	Los Alamos National Laboratory: Catalytic Solubilization and Conversion of Lignocellulosic Feedstocks	50
II.B.3	Gas Technology Institute: One Step Biomass Gas Reforming-Shift Separation Membrane Reactor	54
II.C	Separations	57
II.C.1	Pall Corporation: High-Performance Palladium-Based Membrane for Hydrogen Separation and Purification	57
II.C.2	Media and Process Technology Inc.: Development of Hydrogen Selective Membranes/Modules as Reactors/Separators for Distributed Hydrogen Production	62
II.C.3	Arizona State University: Zeolite Membrane Reactor for Water-Gas Shift Reaction for Hydrogen Production	67
II.D	Hydrogen From Coal	74
II.D.1	Worcester Polytechnic Institute: Composite Pd and Alloy Porous Stainless Steel Membranes for Hydrogen Production and Process Intensification	74
II.D.2	National Energy Technology Laboratory: Development of Robust Hydrogen Separation Membranes	79
II.D.3	Eltron Research Inc.: Scale Up of Hydrogen Transport Membranes for IGCC and FutureGen Plants	82
II.D.4	Southwest Research Institute®: Amorphous Alloy Membranes for High Temperature Hydrogen Separation	86
II.D.5	United Technologies Research Center: Experimental Demonstration of Advanced Palladium Membrane Separators for Central High-Purity Hydrogen Production	90
II.D.6	Worcester Polytechnic Institute: Supported Molten Metal Membrane (SMMM) for Hydrogen Separation	95
II.E	Electrolysis	99
II.E.1	Avāence, LLC: High-Capacity, High-Pressure Electrolysis System with Renewable Power Sources	99
II.E.2	Giner Electrochemical Systems, LLC: PEM Electrolyzer Incorporating an Advanced Low-Cost Membrane	103
II.E.3	National Renewable Energy Laboratory: Renewable Electrolysis Integrated System Development and Testing	107
II.E.4	Proton Energy Systems: High-Performance, Low-Cost Hydrogen Generation from Renewable Energy	112

II.	Hydrogen Production (Continued)	
II.F	Hi-Temp Thermochemical	115
II.F.1	Argonne National Laboratory: R&D Status for the Cu-Cl Thermochemical Cycle-2010	115
II.F.2	Science Applications International Corporation: Solar High-Temperature Water-Splitting Cycle with Quantum Boost	120
II.F.3	University of Colorado: Solar-Thermal Atomic Layer Deposition Ferrite-Based Water Splitting Cycles	126
II.G	Photoelectrochemical	131
II.G.1	University of Hawaii at Manoa: Photoelectrochemical Hydrogen Production: DOE PEC Working Group Overview	131
II.G.2	Stanford University: Nanostructured MoS ₂ and WS ₂ for the Solar Production of Hydrogen	138
II.G.3	University of California, Santa Barbara: Photoelectrochemical Hydrogen Production Using New Combinatorial Chemistry Derived Materials	145
II.G.4	National Renewable Energy Laboratory: Semiconductor Materials for Photoelectrolysis	150
II.G.5	University of Nevada, Las Vegas: Characterization of Materials for Photoelectrochemical Hydrogen Production	157
II.G.6	National Renewable Energy Laboratory: Photoelectrochemical Materials: Theory and Modeling	162
II.G.7	MVSystems, Incorporated: Progress in the Study of Amorphous Silicon Carbide (a-SiC) as a Photoelectrode in Photoelectrochemical (PEC) Cells	167
II.G.8	MVSystems, Incorporated: Progress in the Study of Tungsten Oxide Compounds as Photoelectrodes in Photoelectrochemical Cells	171
II.G.9	MVSystems, Incorporated: Progress in the Study of Copper Chalcopyrites as Photoelectrodes in Photoelectrochemical Cells	175
II.G.10	Xunlight Corporation: Critical Research for Cost-Effective Photoelectrochemical Production of Hydrogen	179
II.G.11	University of Arkansas, Little Rock: Photoelectrochemical Generation of Hydrogen	182
II.G.12	Lawrence Livermore National Laboratory: Characterization and Optimization of Photoelectrode Surfaces for Solar-to-Chemical Fuel Conversion	187
II.G.13	University of Nevada, Reno: Photoelectrochemical Generation of Hydrogen from Water Using Visible Light Sensitive Ferro-Electric BiFeO ₃ and Semiconductor Nanotubes	191
II.H	Biological	195
II.H.1	University of California, Berkeley: Maximizing Light Utilization Efficiency and Hydrogen Production in Microalgal Cultures	195
II.H.2	National Renewable Energy Laboratory: Biological Systems for Hydrogen Photoproduction	198
II.H.3	National Renewable Energy Laboratory: Fermentation and Electrohydrogenic Approaches to Hydrogen Production	203
II.H.4	J. Craig Venter Institute: Hydrogen from Water in a Novel Recombinant Oxygen-Tolerant Cyanobacterial System	208
II.I	Production	212
II.I.1	Physical Optics Corporation: Photochemical System for Hydrogen Generation	212
II.I.2	Synkera Technologies, Inc.: Nanotube Array Photoelectrochemical Hydrogen Production	216
II.I.3	Directed Technologies, Inc.: Aqueous Phase Base-Facilitated Reforming (BFR) of Renewable Fuels	220
II.I.4	ElectroChem, Inc.: Advanced PEM-Based Hydrogen Home Refueling Appliance	224
II.I.5	Giner Electrochemical Systems, LLC: Unitized Design for Home Refueling Appliance for Hydrogen Generation to 5,000 psi	227

II.	Hydrogen Production (Continued)	
II.I	Production (Continued)	
II.I.6	Lynntech, Inc.: Design, Optimization and Fabrication of a Home Hydrogen Fueling System	232
II.I.7	Proton Energy Systems: Hydrogen by Wire - Home Fueling System	236
II.I.8	Materials and Systems Research, Inc.: Development of a Hydrogen Home Fueling System	240
II.J	Cross-Cutting/Production	243
II.J.1	Edison Materials Technology Center: Developing Improved Materials to Support the Hydrogen Economy	243
II.J.2	Purdue University: Purdue Hydrogen Systems Laboratory: Hydrogen Production	245
III.	Hydrogen Delivery	249
III.0	Hydrogen Delivery Sub-Program Overview	251
III.1	Argonne National Laboratory: Hydrogen Delivery Infrastructure Analysis	255
III.2	National Renewable Energy Laboratory: H2A Delivery Analysis and H2A Delivery Components Model	259
III.3	Mohawk Innovative Technologies, Inc.: Oil-Free Centrifugal Hydrogen Compression Technology Demonstration	263
III.4	Concepts NREC: Development of a Centrifugal Hydrogen Pipeline Gas Compressor	267
III.5	Praxair, Inc.: Advanced Hydrogen Liquefaction Process	274
III.6	Prometheus Energy: Active Magnetic Regenerative Liquefier	278
III.7	Lawrence Livermore National Laboratory: Inexpensive Delivery of Cold Hydrogen in High Performance Glass Fiber Pressure Vessels	282
III.8	Lincoln Composites, Inc.: Development of High Pressure Hydrogen Storage Tank for Storage and Gaseous Truck Delivery	290
III.9	Savannah River National Laboratory: Fiber Reinforced Composite Pipelines	293
III.10	University of Illinois at Urbana-Champaign: Hydrogen Embrittlement of Pipeline Steels: Fundamentals, Experiments, Modeling	296
III.11	Oak Ridge National Laboratory: Composite Technology for Hydrogen Pipelines	302
III.12	Sandia National Laboratories: Hydrogen Embrittlement of Structural Steels	306
III.13	Gas Equipment Engineering Corporation: Innovative Hydrogen Liquefaction Cycle	310
III.14	Air Products and Chemicals, Inc.: Reversible Liquid Carriers for an Integrated Production, Storage and Delivery of Hydrogen	314
III.15	Secat, Inc.: Materials Solutions for Hydrogen Delivery in Pipelines	318
III.16	FuelCell Energy, Inc.: Development of Highly Efficient Solid-State Electrochemical Hydrogen Compressor	323
III.17	Oak Ridge National Laboratory: Hydrogen Permeability and Integrity of Steel Welds	326
III.18	Argonne National Laboratory: Hydrogen Pipeline Compressors	333
III.19	Mohawk Innovative Technologies, Inc.: Advanced Sealing Technology for Hydrogen Compression	337
III.20	Lawrence Livermore National Laboratory: Rapid Low-Loss Cryogenic Hydrogen Refueling	341
III.21	Oak Ridge National Laboratory: Range Optimization for Fuel Cell Vehicles	344
IV.	Hydrogen Storage	349
IV.0	Hydrogen Storage Sub-Program Overview	351
IV.A	Metal Hydride CoE	361
IV.A.1a	Sandia National Laboratories: Five-Year Review of Metal Hydride Center of Excellence	361
IV.A.1b	University of Hawaii: Fundamental Studies of Advanced High-Capacity, Reversible Metal Hydrides	364

IV.	Hydrogen Storage (Continued)	
IV.A	Metal Hydride CoE (Continued)	
IV.A.1c	Ohio State University: Lightweight Metal Hydrides for Hydrogen Storage.	371
IV.A.1d	Sandia National Laboratories: Development of Metal Hydrides at Sandia National Laboratories	377
IV.A.1e	Brookhaven National Laboratory: Aluminum Hydride Regeneration	385
IV.A.1f	University of Illinois at Urbana-Champaign: Reversible Hydrogen Storage Materials - Structure, Chemistry, and Electronic Structure	389
IV.A.1g	Savannah River National Laboratory: Electrochemical Reversible Formation of Alane.	394
IV.A.1h	National Institute of Standards and Technology: Neutron Characterization and Calphad in Support of the Metal Hydride Center of Excellence.	399
IV.A.1i	Oak Ridge National Laboratory: Metal Borohydrides, Ammines, and Aluminum Hydrides as Hydrogen Storage Materials	404
IV.A.1j	Jet Propulsion Laboratory: Development and Evaluation of Advanced Hydride Systems for Reversible Hydrogen Storage.	408
IV.A.1k	Savannah River National Laboratory: Li-Mg-N Hydrogen Storage Materials	413
IV.A.1l	University of Nevada, Reno: Effect of Gaseous Impurities on Long-Term Thermal Cycling and Aging Properties of Complex Hydrides for Hydrogen Storage	417
IV.A.2	Sandia National Laboratories: Tunable Thermodynamics and Kinetics for Hydrogen Storage: Nanoparticle Synthesis Using Ordered Polymer Templates	423
IV.A.3	Northwestern University: Efficient Discovery of Novel Multicomponent Mixtures for Hydrogen Storage: A Combined Computational/Experimental Approach.	428
IV.A.4	Delaware State University: Hydrogen Storage Materials for Fuel Cell-Powered Vehicles	433
IV.B	Chemical Hydrogen Storage CoE	437
IV.B.1a	Los Alamos National Laboratory: 2010 Overview and Wrapup: DOE Chemical Hydrogen Storage Center of Excellence (CHSCoE)	437
IV.B.1b	University of Oregon: Hydrogen Storage by Novel CBN Heterocycle Materials.	443
IV.B.1c	Los Alamos National Laboratory: Chemical Hydrogen Storage R&D at Los Alamos National Laboratory	447
IV.B.1d	Pacific Northwest National Laboratory: Chemical Hydrogen Storage Research at PNNL	453
IV.C	Hydrogen Sorption CoE.	460
IV.C.1a	National Renewable Energy Laboratory: Overview of the DOE Hydrogen Sorption Center of Excellence	460
IV.C.1b	Texas A&M University: A Biomimetic Approach to Metal-Organic Frameworks with High H ₂ Uptake.	468
IV.C.1c	University of Missouri: Multiply Surface-Functionalized Nanoporous Carbon for Vehicular Hydrogen Storage	474
IV.C.1d	National Institute of Standards and Technology: Neutron Characterization in Support of the Hydrogen Sorption Center of Excellence	481
IV.C.1e	National Renewable Energy Laboratory: NREL Research as Part of the Hydrogen Sorption Center of Excellence	486
IV.C.1f	Argonne National Laboratory: Hydrogen Storage through Nanostructured Porous Organic Polymers (POPs)	495
IV.C.1g	University of Michigan: Hydrogen Storage by Spillover.	499
IV.C.1h	Lawrence Livermore National Laboratory: Carbon Aerogels for Hydrogen Storage.	502
IV.C.2	State University of New York, Syracuse: Nanostructured Activated Carbon for Hydrogen Storage.	506
IV.C.3	Gas Technology Institute: Electron Charged Graphite-Based Hydrogen Storage Material	510

IV.	Hydrogen Storage (Continued)	
IV.D	Hydrogen Storage Engineering CoE.	514
IV.D.1a	Savannah River National Laboratory: Hydrogen Storage Engineering Center of Excellence.	514
IV.D.1b	Pacific Northwest National Laboratory: Systems Engineering of Chemical Hydride, Pressure Vessel, and Balance of Plant for On-Board Hydrogen Storage.	519
IV.D.1c	United Technologies Research Center: Advancement of Systems Designs and Key Engineering Technologies for Materials-Based Hydrogen Storage	524
IV.D.1d	Los Alamos National Laboratory: Chemical Hydride Rate Modeling, Validation, and System Demonstration.	529
IV.D.1e	National Renewable Energy Laboratory: System Design, Analysis, Modeling, and Media Engineering Properties for Hydrogen Energy Storage	537
IV.D.1f	General Motors Company: System Design and Media Structuring for On-Board Hydrogen Storage Technologies	541
IV.D.1g	Ford Motor Company: Ford/BASF-SE/UM Activities in Support of the Hydrogen Storage Engineering Center of Excellence	546
IV.D.1h	Savannah River National Laboratory: SRNL Technical Work Scope for the Hydrogen Storage Engineering Center of Excellence	551
IV.D.1i	Jet Propulsion Laboratory: Key Technologies, Thermal Management, and Prototype Testing for Advanced Solid-State Hydrogen Storage Systems	556
IV.D.1j	Oregon State University: Microscale Enhancement of Heat and Mass Transfer for Hydrogen Energy Storage	560
IV.D.1k	Lincoln Composites, Inc.: Development of Improved Composite Pressure Vessels for Hydrogen Storage.	563
IV.E	Storage Testing, Safety and Analysis	566
IV.E.1	Argonne National Laboratory: On-Board and Off-Board Analyses of Hydrogen Storage Options	566
IV.E.2	TIAX, LLC: Analyses of Hydrogen Storage Materials and On-Board Systems.	572
IV.E.3	Savannah River National Laboratory: Fundamental Reactivity Testing and Analysis of Hydrogen Storage Materials.	576
IV.E.4	United Technologies Research Center: Quantifying and Addressing the DOE Material Reactivity Requirements with Analysis and Testing of Hydrogen Storage Materials and Systems.	581
IV.E.5	Sandia National Laboratories: The Reactivity Properties of Hydrogen Storage Materials in the Context of Systems	586
IV.E.6	H2 Technology Consulting LLC: Best Practices for Characterizing Hydrogen Storage Properties of Materials	591
IV.F	New Materials-Independent Projects	595
IV.F.1	University of California, Los Angeles: A Joint Theory and Experimental Project in the Synthesis and Testing of Porous COFs for On-Board Vehicular Hydrogen Storage.	595
IV.F.2	Northwestern University: New Carbon-Based Porous Materials with Increased Heats of Adsorption for Hydrogen Storage.	600
IV.F.3	Pennsylvania State University: Hydrogen Trapping through Designer Hydrogen Spillover Molecules with Reversible Temperature and Pressure-Induced Switching	605
IV.F.4	Los Alamos National Laboratory: Capacitive Hydrogen Storage Systems: Molecular Design of Structured Dielectrics	610
IV.G	Tanks	615
IV.G.1	Lawrence Livermore National Laboratory: Extended Dormancy, Vacuum Stability, and Para-Ortho Hydrogen Conversion in Cryogenic Pressure Vessels.	615
IV.G.2	Oak Ridge National Laboratory: Lifecycle Verification of Polymeric Storage Liners	619
IV.G.3	Oak Ridge National Laboratory: High Strength Carbon Fibers	622

IV.	Hydrogen Storage (Continued)	
IV.H	Cross-Cutting	628
IV.H.1	SiGNa: NaSi and Na-SG Powder Hydrogen Fuel Cells	628
IV.H.2	Purdue University: Purdue Hydrogen Systems Laboratory: Hydrogen Storage	632
IV.H.3	University of Nevada, Las Vegas: HGMS: Glasses and Nanocomposites for Hydrogen Storage.	637
IV.H.4	University of Arkansas, Little Rock: An Integrated Approach of Hydrogen Storage in Complex Hydrides of Transitional Elements	639
IV.I	Test/Analysis	647
IV.I.1	Southwest Research Institute®: Standardized Testing Program for Solid-State Hydrogen Storage Technologies	647
V.	Fuel Cells	653
V.0	Fuel Cells Sub-Program Overview	655
V.A	Analysis/Characterization	661
V.A.1	Argonne National Laboratory: Fuel Cell Systems with Low Platinum Loadings	661
V.A.2	Directed Technologies, Inc.: Mass-Production Cost Estimation for Automotive Fuel Cell Systems	667
V.A.3	TIAX, LLC: Cost Analyses of Fuel Cell Stacks/Systems	672
V.A.4	Oak Ridge National Laboratory: Characterization of Fuel Cell Materials	680
V.A.5	National Institute of Standards and Technology: Neutron Imaging Study of the Water Transport in Operating Fuel Cells	686
V.A.6	Battelle: Economic Analysis of Stationary PEM Fuel Cell Systems	693
V.A.7	Argonne National Laboratory: Fuel Cell Testing at Argonne National Laboratory	699
V.A.8	Los Alamos National Laboratory: Technical Assistance to Developers	703
V.B	Water Transport Studies	706
V.B.1	Los Alamos National Laboratory: Water Transport Exploratory Studies	706
V.B.2	CFD Research Corp.: Water Transport in PEM Fuel Cells: Advanced Modeling, Material Selection, Testing, and Design Optimization	711
V.B.3	Rochester Institute of Technology: Visualization of Fuel Cell Water Transport and Performance Characterization Under Freezing Conditions	716
V.C	Impurities	722
V.C.1	Los Alamos National Laboratory: Effects of Fuel and Air Impurities on PEM Fuel Cell Performance	722
V.C.2	Clemson University: Fundamental Effects of Impurities on Fuel Cell Performance and Durability	727
V.C.3	University of Connecticut: The Effects of Impurities on Fuel Cell Performance and Durability	731
V.C.4	National Renewable Energy Laboratory: Effect of System and Air Contaminants on PEMFC Performance and Durability	737
V.D	Membranes	741
V.D.1	Lawrence Livermore National Laboratory: New Polyelectrolyte Materials for High Temperature Fuel Cells	741
V.D.2	3M Company: Membranes and MEAs for Dry, Hot Operating Conditions	748
V.D.3	Giner Electrochemical Systems, LLC: Dimensionally Stable Membranes (DSMs)	754
V.D.4	University of Central Florida: Lead Research and Development Activity for DOE's High Temperature, Low Relative Humidity Membrane Program	758
V.D.5	Case Western Reserve University: Poly(p-Phenylene Sulfonic Acids): PEMs with Frozen-In Free Volume	761
V.D.6	Vanderbilt University: NanoCapillary Network Proton Conducting Membranes for High Temperature Hydrogen/Air Fuel Cells	767

V.	Fuel Cells (Continued)	
V.D	Membranes (Continued)	
V.D.7	Colorado School of Mines: Novel Approaches to Immobilized Heteropoly Acid (HPA) Systems for High Temperature, Low Relative Humidity Polymer-Type Membranes	772
V.D.8	FuelCell Energy, Inc.: High Temperature Membrane with Humidification-Independent Cluster Structure	777
V.D.9	Arkema Inc.: Improved, Low-Cost, Durable Fuel Cell Membranes	782
V.D.10	University of Arizona: Protic Salt Polymer Membranes: High-Temperature Water-Free Proton-Conducting Membranes.	786
V.E	Catalysts	790
V.E.1	3M Company: Advanced Cathode Catalysts and Supports for PEM Fuel Cells	790
V.E.2	UTC Power: Highly Dispersed Alloy Catalyst for Durability	799
V.E.3	Pacific Northwest National Laboratory: Development of Alternative and Durable High Performance Cathode Supports for PEM Fuel Cells	805
V.E.4	Argonne National Laboratory: Non-Platinum Bimetallic Cathode Electrocatalysts	811
V.E.5	Los Alamos National Laboratory: Advanced Cathode Catalysts	816
V.E.6	3M Company: Durable Catalysts for Fuel Cell Protection during Transient Conditions.	825
V.E.7	National Renewable Energy Laboratory: Extended, Continuous Pt Nanostructures in Thick, Dispersed Electrodes.	830
V.E.8	Argonne National Laboratory: Nanosegregated Cathode Alloy Catalysts with Ultra-Low Platinum Loading	835
V.E.9	Brookhaven National Laboratory: Contiguous Platinum Monolayer Oxygen Reduction Electrocatalysts on High-Stability Low-Cost Supports	841
V.E.10	Los Alamos National Laboratory: The Science and Engineering of Durable Ultralow PGM Catalysts	845
V.E.11	Lawrence Livermore National Laboratory: Molecular-Scale, Three-Dimensional Non-Platinum Group Metal Electrodes for Catalysis of Fuel Cell Reactions	850
V.F	Water Management.	857
V.F.1	Nuvera Fuel Cells, Inc.: CIRRUS: Cell Ice Regulation & Removal Upon Start-Up	857
V.G	Distributed Energy	861
V.G.1	Intelligent Energy: Development and Demonstration of a New Generation High Efficiency 10-kW Stationary PEM Fuel Cell System	861
V.G.2	Acumentrics Corporation: Development of a Low Cost 3-10 kW Tubular SOFC Power System	866
V.G.3	Plug Power Inc.: Intergovernmental Stationary Fuel Cell System Demonstration	870
V.G.4	IdaTech, LLC: Research and Development for Off-Road Fuel Cell Applications	873
V.H	Degradation Studies	876
V.H.1	Argonne National Laboratory: Polymer Electrolyte Fuel Cell Lifetime Limitations: The Role of Electrocatalyst Degradation.	876
V.H.2	Los Alamos National Laboratory: Durability Improvements through Degradation Mechanism Studies	881
V.H.3	Nuvera Fuel Cells, Inc.: Durability of Low Platinum Fuel Cells Operating at High Power Density.	886
V.H.4	UTC Power: Improved Accelerated Stress Tests Based on Fuel Cell Vehicle Data.	890
V.H.5	Los Alamos National Laboratory: Accelerated Testing Validation.	895
V.H.6	Ballard Power Systems: Development of Micro-Structural Mitigation Strategies for PEM Fuel Cells: Morphological Simulations and Experimental Approaches.	899
V.I	Auxiliary Power	903
V.I.1	Cummins Power Generation: Diesel-Fueled SOFC System for Class 7/Class 8 On-Highway Truck Auxiliary Power.	903

V.	Fuel Cells (Continued)	
V.I	Auxiliary Power (Continued)	
V.I.2	Delphi Corporation: Solid Oxide Fuel Cell Development for Auxiliary Power in Heavy Duty Vehicle Applications	907
V.J	Portable Power	911
V.J.1	National Renewable Energy Laboratory: Novel Approach to Advanced Direct Methanol Fuel Cell (DMFC) Anode Catalysts	911
V.J.2	Arkema Inc.: Novel Materials for High Efficiency Direct Methanol Fuel Cells	915
V.J.3	University of North Florida: New MEA Materials for Improved DMFC Performance, Durability, and Cost.	917
V.K	Balance of Plant	919
V.K.1	Honeywell Aerospace: Development of Thermal and Water Management System for PEM Fuel Cell.	919
V.K.2	W.L. Gore & Associates, Inc.: Materials and Modules for Low-Cost, High-Performance Fuel Cell Humidifiers	922
V.L	Hardware	925
V.L.1	Oak Ridge National Laboratory: Nitrided Metallic Bipolar Plates.	925
V.L.2	TreadStone Technologies, Inc.: Low-Cost PEM Fuel Cell Metal Bipolar Plates	930
V.L.3	Argonne National Laboratory: Metallic Bipolar Plates with Composite Coatings.	934
V.L.4	UTC Power: Low-Cost Durable Seals for PEMFCs	939
V.M	Transport Studies	943
V.M.1	Plug Power Inc.: Air-Cooled Stack Freeze Tolerance.	943
V.M.2	Lawrence Livermore National Laboratory: Fuel Cell Fundamentals at Low and Subzero Temperatures.	948
V.M.3	Sandia National Laboratories: Development and Validation of a Two-Phase, Three-dimensional Model for PEM Fuel Cells	952
V.M.4	Nuvera Fuel Cells, Inc.: Transport Studies Enabling Efficiency Optimization of Cost-Competitive Fuel Cell Stacks	956
V.M.5	Giner Electrochemical Systems, LLC: Transport Studies and Modeling in PEM Fuel Cells.	960
V.N	Innovative Concepts	963
V.N.1	Versa Power Systems: Advanced Materials for RSOFC Dual Operation with Low Degradation	963
V.N.2	Los Alamos National Laboratory: Resonance-Stabilized Anion Exchange Polymer Electrolytes	967
V.N.3	Los Alamos National Laboratory: Engineered Nano-Scale Ceramic Supports for PEM Fuel Cells	971
V.O	Cross-Cutting	978
V.O.1	Michigan Technological University: Center for Fundamental and Applied Research in Nanostructured and Lightweight Materials.	978
V.O.2	Colorado School of Mines: Renewable and Logistics Fuels for Fuel Cells at the Colorado School of Mines.	983

V.P.27	Lehigh University: Porous and Glued Ultrathin Membranes	1106
V.P.28	University of Pennsylvania: The Development of Nano-Composite Electrodes for Solid Oxide Electrolyzers	1109
V.P.29	Pacific Northwest National Laboratory: Charge Transfer, Transport, and Reactivity in Complex Molecular Environments: Theoretical Studies for the Hydrogen Fuel Initiative	1112
V.P.30	Lawrence Berkeley National Laboratory: Proton Conduction in Rare-Earth Phosphates	1115
V.P.31	University of Tennessee: The Dielectric Response of Hydrated PFSA membranes – Measurements with Single Post Dielectric Resonators	1118
VI.	Manufacturing	1121
VI.0	Manufacturing Sub-Program Overview	1123
VI.1	National Renewable Energy Laboratory: Fuel Cell Membrane Electrode Assembly Manufacturing R&D	1127
VI.2	Ballard Material Products, Inc.: Reduction in Fabrication Costs of Gas Diffusion Layers	1131
VI.3	UltraCell Corporation: Modular, High-Volume Fuel Cell Leak-Test Suite and Process.	1135
VI.4	W. L. Gore & Associates, Inc.: Manufacturing of Low-Cost, Durable Membrane Electrode Assemblies Engineered for Rapid Conditioning	1139
VI.5	Rensselaer Polytechnic Institute: Adaptive Process Controls and Ultrasonics for High Temperature PEM MEA Manufacture	1144
VI.6	National Institute of Standards and Technology: Cause-and-Effect: Flow Field Plate Manufacturing Variability and its Impact on Performance.	1149
VI.7	National Institute of Standards and Technology: Non-Contact Sensor Evaluation for Bipolar Plate Manufacturing Process Control	1153
VI.8	National Institute of Standards and Technology: Optical Scatterfield Metrology for Online Catalyst Coating Inspection of PEM Soft Goods	1157
VI.9	BASF Fuel Cell, Inc.: High-Speed, Low-Cost Fabrication of Gas Diffusion Electrodes for Membrane Electrode Assemblies	1162
VI.10	Quantum Fuel Systems Technologies Worldwide, Inc.: Development of Advanced Manufacturing Technologies for Low Cost Hydrogen Storage Vessels	1165
VII.	Systems Analysis.	1169
VII.0	Systems Analysis Sub-Program Overview	1171
VII.1	National Renewable Energy Laboratory: Scenario Evaluation, Regionalization and Analysis (SERA) Model.	1177
VII.2	Sandia National Laboratories: Analysis of Energy Infrastructures and Potential Impacts from an Emergent Hydrogen Fueling Infrastructure	1181
VII.3	Argonne National Laboratory: Agent-Based Model of the Transition to Hydrogen-Based Personal Transportation: Consumer Adoption and Infrastructure Development Including Combined Hydrogen, Heat, and Power	1185
VII.4	Oak Ridge National Laboratory: HyTrans Model: Analyzing the Potential for Stationary Fuel Cells to Augment Hydrogen Availability in the Transition to Hydrogen Vehicles	1187
VII.5	National Renewable Energy Laboratory: Biogas Resources Characterization	1191
VII.6	National Renewable Energy Laboratory: Cost and GHG Implications of Hydrogen for Energy Storage	1196

VII. Systems Analysis (Continued)	
VII.7 Lawrence Livermore National Laboratory: Hydrogen and Water: Engineering, Economics and Environment	1200
VII.8 National Renewable Energy Laboratory: Analysis of Business Cases with the Fuel Cell Power Model.	1205
VII.9 Argonne National Laboratory: Fuel Quality in Fuel Cell Systems	1209
VII.10 National Renewable Energy Laboratory: Macro System Model	1213
VII.11 Argonne National Laboratory: Life-Cycle Analysis of Criteria Pollutant Emissions from Stationary Fuel Cell Systems with the GREET Model.	1217
VII.12 Brookhaven National Laboratory: CO ₂ Reduction Benefits Analysis for Fuel Cell Applications	1223
VII.13 Pacific Northwest National Laboratory: Pathways to Commercial Success: Technologies and Products Supported by the FCT Program	1228
VII.14 National Renewable Energy Laboratory: Fuel Cell Power Model: Evaluation of CHP and CHHP Applications	1232
VII.15 TIAX, LLC: Geo-Spatial Analysis of Hydrogen Infrastructure	1236
VII.16 National Renewable Energy Laboratory: HyDRA: Hydrogen Demand and Resource Analysis Tool	1240
VIII. Technology Validation	1245
VIII.0 Technology Validation Sub-Program Overview	1247
VIII.1 National Renewable Energy Laboratory: Controlled Hydrogen Fleet and Infrastructure Analysis	1253
VIII.2 Chevron Technology Ventures LLC: Controlled Hydrogen Fleet and Infrastructure Demonstration and Validation Project	1261
VIII.3 Mercedes-Benz Research & Development North America, Inc.: Hydrogen to the Highways	1264
VIII.4 General Motors Company: Hydrogen Vehicle and Infrastructure Demonstration and Validation	1269
VIII.5 Air Products and Chemicals, Inc.: Validation of an Integrated Hydrogen Energy Station	1273
VIII.6 Air Products and Chemicals, Inc.: California Hydrogen Infrastructure Project.	1277
VIII.7 National Renewable Energy Laboratory: Technology Validation: Fuel Cell Bus Evaluations	1280
VIII.8 Hawaii Natural Energy Institute: Hawaii Hydrogen Power Park.	1284
VIII.9 Tanadgusix Foundation: TDX Foundation Hydrogen Project/PEV Project	1288
VIII.10 Texas H2 Coalition: Texas Hydrogen Highway.	1291
VIII.11 University of Central Florida: Florida Hydrogen Initiative	1294
IX. Safety, Codes, and Standards	1299
IX.0 Safety, Codes, and Standards Sub-Program Overview	1301
IX.1 National Renewable Energy Laboratory: National Codes and Standards Template.	1307
IX.2 National Renewable Energy Laboratory: Component Standard Research and Development.	1311
IX.3 National Renewable Energy Laboratory: Codes and Standards Training and Outreach and Education for Emerging Fuel Cell Technologies	1315
IX.4 Los Alamos National Laboratory: Hydrogen Safety Sensors	1319
IX.5 Sandia National Laboratories: Materials and Components Compatibility	1326
IX.6 Pacific Northwest National Laboratory: Hydrogen Safety Knowledge Tools	1332
IX.7 Los Alamos National Laboratory: Hydrogen Fuel Quality	1335
IX.8 Pacific Northwest National Laboratory: Hydrogen Safety Panel	1338
IX.9 Sandia National Laboratories: Hydrogen Release Behavior	1342
IX.10 Sandia National Laboratories: Risk-Informed Separation Distances for H ₂ Facilities	1347

IX.	Safety, Codes, and Standards (Continued)	
IX.11	Sandia National Laboratories: International Energy Agency Hydrogen Implementing Agreement Task 19 Hydrogen Safety	1352
IX.12	Intelligent Optical Systems, Inc.: Safe Detector System for Hydrogen Leaks	1355
IX.13	Pacific Northwest National Laboratory: Hydrogen Safety Training for First Responders	1360
IX.14	Lawrence Livermore National Laboratory: Hydrogen Safety Training for Researchers	1363
IX.15	Oak Ridge National Laboratory: Optically Read MEMS Hydrogen Sensor	1366
X.	Education	1371
X.0	Education Sub-Program Overview	1373
X.1	Pacific Northwest National Laboratory: Hydrogen Safety Training for First Responders	1379
X.2	National Renewable Energy Laboratory: Education for Emerging Fuel Cell Technologies	1382
X.3	California State University, Los Angeles: Hydrogen and Fuel Cell Education at California State University, Los Angeles	1385
X.4	Humboldt State University Sponsored Programs Foundation: Hydrogen Energy in Engineering Education (H ₂ E ³)	1389
X.5	Michigan Technological University: Hydrogen Education Curriculum Path at Michigan Technological University	1393
X.6	University of Central Florida: Bachelor of Science Engineering Technology Hydrogen and Fuel Cell Program Concentration	1396
X.7	University of North Dakota: Development of a Renewable Hydrogen Production and Fuel Cell Education Program	1400
X.8	Carolina Tractor & Equipment Co. Inc.: Dedicated to The Continued Education, Training and Demonstration of PEM Fuel Cell Powered Lift Trucks In Real-World Applications	1404
X.9	Houston Advanced Research Center: Hydrogen Education in Texas	1408
X.10	South Carolina Hydrogen and Fuel Cell Alliance: Development of Hydrogen Education Programs for Government Officials	1411
X.11	Commonwealth of Virginia: VA-MD-DC Hydrogen Education for Decision Makers	1414
X.12	Connecticut Center for Advanced Technology, Inc.: State and Local Partnership Building	1417
X.13	Ohio Fuel Cell Coalition: Raising H ₂ and Fuel Cell Awareness in Ohio	1420
X.14	Technology Transition Corporation: H2L3: Hydrogen Learning for Local Leaders	1422
X.15	Clean Energy States Alliance: Hydrogen Education State Partnership Program	1426
X.16	University of California, Berkeley: Hydrogen Technology and Energy Curriculum (HyTEC)	1428
X.17	National Energy Education Development Project: H ₂ Educate – Middle School Hydrogen Education Program	1432
XI.	Fuel Cell Technologies ARRA	1435
XI.0	Fuel Cell Technologies ARRA Projects Overview	1437
XI.1	MTI Micro Fuel Cells, Inc.: Commercialization Effort for 1 W Consumer Electronics Power Pack	1443
XI.2	Delphi Automotive Systems, LLC: Solid Oxide Fuel Cell Diesel Auxiliary Power Unit Demonstration	1446
XI.3	Plug Power Inc.: Highly Efficient, 5 kW CHP Fuel Cells Demonstrating Durability and Economic Value in Residential and Light Commercial Applications	1449
XI.4	University of North Florida: Advanced Direct Methanol Fuel Cell for Mobile Computing	1452

XI.	Fuel Cell Technologies ARRA (Continued)	
XI.5	Jadoo Power, Inc.: Jadoo Power Fuel Cell Demonstration	1454
XI.6	ReliOn, Inc.: PEM Fuel Cell Systems Providing Back-Up Power to Commercial Cellular Towers and an Electric Utility Communications Network	1456
XI.7	Plug Power Inc.: Accelerating Acceptance of Fuel Cell Backup Power Systems	1460
XI.8	Nuvera Fuel Cells, Inc.: H-E-B Grocery Total Power Solution for Fuel Cell-Powered Material Handling Equipment	1462
XI.9	FedEx Freight: Fuel Cell-Powered Lift Truck FedEx Freight Fleet Deployment	1466
XI.10	Sysco of Houston: Fuel Cell-Powered Lift Truck Sysco Houston Fleet Deployment	1468
XI.11	GENCO: Fuel Cell-Powered Lift Truck GENCO Fleet Deployment	1470
XI.12	Sprint Nextel: Demonstrating Economic and Operational Viability of 72-Hour Hydrogen PEM Fuel Cell Systems to Support Emergency Communications on the Sprint Nextel Network	1472
XII.	Small Business Innovation Research	1475
XII.0	Small Business Innovation Research (SBIR) Hydrogen Program New Projects Awarded in FY 2010	1477
	Phase I Projects	1478
XII.1	Creare Incorporated: Low-Cost, Durable Water Vapor Transport Exchanger	1478
XII.2	Engineering, Procurement & Construction, LLC: Hydrogen Fueling Station Cost Reduction; Study of a Cryogenic Liquid Phase Pump as an Alternative to Gas Compression	1478
XII.3	Hawaii Hydrogen Carriers, LLC: Low Cost Metal Hydride Hydrogen Storage System for Forklift Applications	1478
XII.4	Proton Energy Systems: Low Cost Large Scale PEM Electrolysis for Renewable Energy Storage	1479
XII.5	FuelCell Energy, Inc.: Thermochemically Integrated Solid State Hydrogen Separator and Compressor	1479
XII.6	Reaction Systems, LLC: A Novel Process for Improved Hydrogen Separation and Recovery	1479
XII.7	TDA Research, Inc.: Poison-Tolerant WGS Catalyst for Biomass-Coal Co-Gasification Systems	1479
	STTR Projects	1480
XII.8	Technology Assessment and Transfer, Inc.: Novel Ceramic Membranes for Efficient Hydrogen Recovery	1480
	Phase II Projects	1480
XII.9	Giner Electrochemical Systems, LLC: Unitized Design for Home Refueling Appliance for Hydrogen Generation to 5000 psi	1480
XII.10	H2 Pump, LLC: Process Intensification of Hydrogen Unit Operations Using an Electrochemical Device	1480
XII.11	Proton Energy Systems: Hydrogen by Wire Home Fueling System	1480
XIII.	Acronyms, Abbreviations and Definitions	1481
XIV.	Primary Contacts Index	1499
XV.	Hydrogen Program Contacts	1503
XVI.	Project Listings by State	1507
XVII.	Project Listings by Organization	1533
