
XVII. Project Listings by Organization

3M Company

II.A.4	Low-Cost Large-Scale PEM Electrolysis for Renewable Energy Storage	II-22
V.A.1	Durable Catalysts for Fuel Cell Protection during Transient Conditions	V-9
V.A.3	Nanosegregated Cathode Catalysts with Ultra-Low Platinum Loading	V-19
V.C.1	High-Performance, Durable, Low-Cost Membrane Electrode Assemblies for Transportation Applications	V-90
V.F.1	Fuel Cell Fundamentals at Low and Subzero Temperatures	V-141
V.L.1	Advanced Ionomers and MEAs for Alkaline Membrane Fuel Cells	V-235

Addison Bain

VIII.9	Hydrogen Safety Panel and Hydrogen Safety Knowledge Tools	VIII-46
--------	---	---------

Advanced Technology International

IX.3	Landfill Gas-to-Hydrogen	IX-16
------	--------------------------	-------

Air Products and Chemicals, Inc.

VIII.9	Hydrogen Safety Panel and Hydrogen Safety Knowledge Tools	VIII-46
X.4	Use of 72-Hour Hydrogen PEM Fuel Cell Systems to Support Emergency Communications	X-16

Altery Systems

X.4	Use of 72-Hour Hydrogen PEM Fuel Cell Systems to Support Emergency Communications	X-16
-----	---	------

Ameresco, Inc.

IX.3	Landfill Gas-to-Hydrogen	IX-16
------	--------------------------	-------

AOC, LLC

IV.F.4	Synergistically Enhanced Materials and Design Parameters for Reducing the Cost of Hydrogen Storage Tanks	IV-171
--------	--	--------

Argonne National Laboratory

II.B.1	Electrolyzer Development in the Cu-Cl Thermochemical Cycle	II-43
III.1	Hydrogen Delivery Infrastructure Analysis	III-11
IV.A.1	System Analysis of Physical and Materials-Based Hydrogen Storage Options	IV-11
V.A.3	Nanosegregated Cathode Catalysts with Ultra-Low Platinum Loading	V-19
V.C.1	High-Performance, Durable, Low-Cost Membrane Electrode Assemblies for Transportation Applications	V-90
V.C.2	Rationally Designed Catalyst Layers for PEMFC Performance Optimization	V-95
V.D.1	Durability Improvements through Degradation Mechanism Studies	V-98
V.D.2	Durability of Low-Platinum Fuel Cells Operating at High Power Density	V-104
V.H.1	Fuel Cells Systems Analysis	V-175
V.N.10	Structure/Composition/Function Relationships in Supported Nanoscale Catalysts for Hydrogen	V-276
IX.6	Fuel Cells as Range Extenders for Battery Electric Vehicles	IX-26
XI.5	Life-Cycle Analysis of Hydrogen Onboard Storage Options	XI-29
XI.6	Employment Impacts of Infrastructure Development for Hydrogen and Fuel Cell Technologies	XI-33
XI.10	Life-Cycle Analysis of Water Use for Hydrogen Production Pathways	XI-48

Arizona State University

VI.3 Adaptive Process Controls and Ultrasonics for High-Temperature PEM MEA Manufacture VI-17

Arkema Inc.

VI.1 Novel Materials for High Efficiency Direct Methanol Fuel Cells V-216

Automotive Fuel Cell Cooperation

V.A.1 Durable Catalysts for Fuel Cell Protection during Transient Conditions V-9

Ballard Fuel Cells

V.A.5 The Science and Engineering of Durable Ultra-Low PGM Catalysts. V-31

Ballard Material Products, Inc.

V.F.2 Transport in PEMFCs V-147

Ballard Power Systems

V.D.1 Durability Improvements through Degradation Mechanism Studies V-98

V.D.3 Accelerated Testing Validation V-109

V.D.5 Development of Micro-Structural Mitigation Strategies for PEM Fuel Cells: Morphological Simulations and Experimental Approaches. V-121

V.E.2 The Effect of Airborne Contaminants on Fuel Cell Performance and Durability V-135

V.G.3 Roots Air Management System with Integrated Expander. V-170

V.H.7 A Total Cost of Ownership Model for Design and Manufacturing Optimization of Fuel Cells in Stationary and Emerging Market Applications V-207

BASF Fuel Cell, Inc.

VI.5 High-Speed, Low-Cost Fabrication of Gas Diffusion Electrodes for Membrane Electrode Assemblies. VI-27

Battelle

V.H.6 Stationery and Emerging Market Fuel Cell System Cost Analysis - Material Handling Equipment. V-203

VII.1 Technology Validation: Fuel Cell Bus Evaluations VII-7

Becht Engineering

VIII.9 Hydrogen Safety Panel and Hydrogen Safety Knowledge Tools. VIII-46

Ben C. Gerwick Inc.

III.7 Vessel Design and Fabrication Technology for Stationary High-Pressure Hydrogen Storage III-37

Black & Veatch Corporation

X.4 Use of 72-Hour Hydrogen PEM Fuel Cell Systems to Support Emergency Communications. X-16

Boeing Research and Technology

VI.6 Development of Advanced Manufacturing Technologies for Low-Cost Hydrogen Storage Vessels VI-30

Brookhaven National Laboratory

II.A.8 Low-Noble-Metal-Content Catalysts/Electrodes for Hydrogen Production by Water Electrolysis II-39

IV.E.4 Aluminum Hydride: the Organometallic Approach IV-146

V.A.4 Contiguous Platinum Monolayer Oxygen Reduction Electrocatalysts on High-Stability Low-Cost Supports. V-26

VI.2 Advanced Materials and Concepts for Portable Power Fuel Cells V-220

Brookhaven National Laboratory (Continued)

- V.N.11 Metal and Metal Oxide-Supported Platinum Monolayer Electrocatalysts for Oxygen Reduction. V-280
 V.N.12 Active Sites and Mechanism for the Water-Gas Shift Reaction on Metal and Metal/Oxide Catalysts V-284

Brown University

- V.A.3 Nanosegregated Cathode Catalysts with Ultra-Low Platinum Loading V-19

Bucknell University

- II.B.4 Solar Hydrogen Production with a Metal Oxide-Based Thermochemical Cycle II-62

Burns & McDonnell Engineering Co., Inc.

- X.4 Use of 72-Hour Hydrogen PEM Fuel Cell Systems to Support Emergency Communications. X-16

California Air Resources Board

- VII.9 Data Collection and Validation of Newport Beach Hydrogen Station Performance VII-41

California Fuel Cell Partnership

- VIII.8 Hydrogen Emergency Response Training for First Responders VIII-43

California Institute of Technology

- II.C.7 Next-Generation Si Microwire Array Devices for Unassisted Photoelectrosynthesis II-97
 IV.B.1 Hydrogen Storage Engineering Center of Excellence IV-29
 IV.D.1 Design of Novel Multi-Component Metal Hydride-Based Mixtures for Hydrogen Storage IV-112

California State University, Los Angeles

- VII.10 California State University Los Angeles Hydrogen Refueling Facility Performance Evaluation and Optimization. VII-43

Carnegie Mellon University

- V.A.12 Non-Precious Metal Fuel Cell Cathodes: Catalyst Development and Electrode Structure Design V-74

Case Western Reserve University

- VI.5 High-Speed, Low-Cost Fabrication of Gas Diffusion Electrodes for Membrane Electrode Assemblies. VI-27

CellEra, Inc.

- V.L.1 Advanced Ionomers and MEAs for Alkaline Membrane Fuel Cells. V-235

City of Santa Fe Springs

- VIII.9 Hydrogen Safety Panel and Hydrogen Safety Knowledge Tools. VIII-46

ClearEdge Power

- IX.2 Fuel Cell Combined Heat and Power Commercial Demonstration. IX-11
 X.2 Highly Efficient, 5-kW CHP Fuel Cells Demonstrating Durability and Economic Value in Residential and Light Commercial Applications X-10

Clemson University

- V.N.2 Fluoropolymers, Electrolytes, Composites and Electrodes. V-247

Colorado School of Mines

- II.B.4 Solar Hydrogen Production with a Metal Oxide-Based Thermochemical Cycle II-62
 V.A.2 Extended, Continuous Pt Nanostructures in Thick, Dispersed Electrodes. V-14

Colorado School of Mines (Continued)

V.A.7 Tungsten Oxide and Heteropoly Acid-Based Systems for Ultra-High Activity and Stability of Pt Catalysts in PEM Fuel Cell Cathodes V-44

V.E.1 Effect of System Contaminants on PEMFC Performance and Durability V-129

V.L.1 Advanced Ionomers and MEAs for Alkaline Membrane Fuel Cells. V-235

Columbia University

V.N.5 Structure-Property Relationship in Metal Carbides and Bimetallic Alloys V-257

Compressed Gas Association

VIII.1 Fuel Cell Technologies National Codes and Standards Development and Outreach VIII-7

Concepts NREC

III.10 Development of a Centrifugal Hydrogen Pipeline Gas Compressor. III-48

Dalhousie University

V.A.1 Durable Catalysts for Fuel Cell Protection during Transient Conditions V-9

Davidson Code Concepts

VIII.1 Fuel Cell Technologies National Codes and Standards Development and Outreach VIII-7

Delaware State University

IV.D.2 Hydrogen Storage Materials for Fuel Cell-Powered Vehicles IV-121

Delphi Automotive Systems, LLC

X.1 Solid Oxide Fuel Cell Diesel Auxiliary Power Unit Demonstration. X-7

Dynalene Inc.

V.G.1 Large-Scale Testing, Demonstration and Commercialization of the Nanoparticle-Based Fuel Cell Coolant (SBIR Phase III) V-162

Eaton Corporation

V.G.3 Roots Air Management System with Integrated Expander. V-170

Electricore, Inc.

V.G.3 Roots Air Management System with Integrated Expander. V-170

X.1 Solid Oxide Fuel Cell Diesel Auxiliary Power Unit Demonstration. X-7

Electrosynthesis Co. Inc.

II.B.2 Solar High-Temperature Water-Splitting Cycle with Quantum Boost II-48

Engineering, Procurement & Construction

III.8 Rapid High-Pressure Liquid Hydrogen Refueling for Maximum Range and Dormancy. III-42

Entegris, Inc.

II.A.3 High-Performance, Low-Cost Hydrogen Generation from Renewable Energy II-18

Ericsson Services, Inc.

X.4 Use of 72-Hour Hydrogen PEM Fuel Cell Systems to Support Emergency Communications. X-16

Firexplo

- VIII.9 Hydrogen Safety Panel and Hydrogen Safety Knowledge Tools. VIII-46

Fluer, Inc.

- VIII.9 Hydrogen Safety Panel and Hydrogen Safety Knowledge Tools. VIII-46

Ford Motor Company

- IV.B.1 Hydrogen Storage Engineering Center of Excellence IV-29
 IV.B.7 Ford/BASF-SE/UM Activities in Support of the Hydrogen Storage Engineering Center of Excellence. IV-67
 IV.D.1 Design of Novel Multi-Component Metal Hydride-Based Mixtures for Hydrogen Storage IV-112
 IV.F.4 Synergistically Enhanced Materials and Design Parameters for Reducing the Cost of Hydrogen Storage Tanks. IV-171
 V.K.1 Low-Cost PEM Fuel Cell Metal Bipolar Plates V-231

Fuel Cell and Hydrogen Energy Association

- VIII.1 Fuel Cell Technologies National Codes and Standards Development and Outreach VIII-7

FuelCell Energy, Inc.

- III.6 Electrochemical Hydrogen Compressor III-33
 V.B.2 High-Temperature Membrane with Humidification-Independent Cluster Structure V-83

Gas Technology Institute

- II.B.1 Electrolyzer Development in the Cu-Cl Thermochemical Cycle II-43
 V.K.1 Low-Cost PEM Fuel Cell Metal Bipolar Plates V-231
 VII.11 Performance Evaluation of Delivered Hydrogen Fueling Stations VII-45
 IX.3 Landfill Gas-to-Hydrogen IX-16

General Motors Company

- IV.B.1 Hydrogen Storage Engineering Center of Excellence IV-29
 IV.B.6 Thermal Management of Onboard Cryogenic Hydrogen Storage Systems IV-63
 IV.C.3 Hydrogen Storage in Metal-Organic Frameworks. IV-89
 IV.E.2 Development of a Practical Hydrogen Storage System Based on Liquid Organic Hydrogen Carriers and a Homogeneous Catalyst. IV-135
 V.A.10 High-Activity Dealloyed Catalysts V-61
 V.A.12 Non-Precious Metal Fuel Cell Cathodes: Catalyst Development and Electrode Structure Design V-74
 V.B.3 Corrugated Membrane Fuel Cell Structures V-86
 V.C.1 High-Performance, Durable, Low-Cost Membrane Electrode Assemblies for Transportation Applications V-90
 V.E.1 Effect of System Contaminants on PEMFC Performance and Durability V-129
 V.F.3 Investigation of Micro- and Macro-Scale Transport Processes for Improved Fuel Cell Performance. V-153
 VIII.9 Hydrogen Safety Panel and Hydrogen Safety Knowledge Tools. VIII-46

George Washington University

- V.A.10 High-Activity Dealloyed Catalysts V-61

Georgetown University

- V.N.19 In Situ NMR/IR/Raman and ab initio DFT Investigations of Pt-Based Mono- and Bi-metallic Nanoscale Electrocatalysts: from Sulfur-Poisoning to Polymer Promoters to Surface Activity Indexes V-309

Georgia Institute of Technology

V.D.5 Development of Micro-Structural Mitigation Strategies for PEM Fuel Cells: Morphological Simulations and Experimental Approaches V-121

V.N.8 Precisely Tunable High Performance Carbon Molecular Sieve Membranes for Energy Intensive Separations V-268

Giner, Inc.

II.A.1 PEM Electrolyzer Incorporating an Advanced Low-Cost Membrane II-11

II.A.6 Unitized Design for Home Refueling Appliance for Hydrogen Generation to 5,000 psi II-31

V.B.1 Dimensionally Stable High Performance Membrane V-79

V.B.2 High-Temperature Membrane with Humidification-Independent Cluster Structure V-83

V.F.2 Transport in PEMFCs V-147

Global Engineering and Technology

III.7 Vessel Design and Fabrication Technology for Stationary High-Pressure Hydrogen Storage III-37

Graftech International Holdings Inc.

V.B.3 Corrugated Membrane Fuel Cell Structures V-86

Greenway Energy, LLC

IV.E.5 Electrochemical Reversible Formation of Alane IV-150

GWS Solutions of Tolland, LLC

VIII.9 Hydrogen Safety Panel and Hydrogen Safety Knowledge Tools VIII-46

H2 Technology Consulting LLC

IV.A.3 Best Practices for Characterizing Engineering Properties of Hydrogen Storage Materials IV-24

IV.C.1 Hydrogen Sorbent Measurement Qualification and Characterization IV-80

H2Pump LLC

VII.3 Hydrogen Recycling System Evaluation and Data Collection VII-15

Hanford Fire Department

VIII.8 Hydrogen Emergency Response Training for First Responders VIII-43

Hawaii Hydrogen Carriers, LLC

IV.E.2 Development of a Practical Hydrogen Storage System Based on Liquid Organic Hydrogen Carriers and a Homogeneous Catalyst IV-135

Hawaii Natural Energy Institute

V.E.2 The Effect of Airborne Contaminants on Fuel Cell Performance and Durability V-135

IX.4 Hydrogen Energy Systems as a Grid Management Tool IX-19

Hazardous Materials Management and Emergency Response Training and Education Center

VIII.8 Hydrogen Emergency Response Training for First Responders VIII-43

HD Systems

XI.1 Worldwide Status of Hydrogen Fuel Cell Vehicle Technology and Prospects for Commercialization XI-13

Hexagon Lincoln

III.3 Development of High-Pressure Hydrogen Storage Tank for Storage and Gaseous Truck Delivery III-21

Hexagon Lincoln (Continued)

IV.B.1	Hydrogen Storage Engineering Center of Excellence	IV-29
IV.B.9	Development of Improved Composite Pressure Vessels for Hydrogen Storage	IV-76
IV.F.4	Synergistically Enhanced Materials and Design Parameters for Reducing the Cost of Hydrogen Storage Tanks	IV-171

HRL Laboratories, LLC

IV.C.2	Room Temperature Hydrogen Storage in Nano-Confined Liquids	IV-84
--------	--	-------

Hydrogenics Corporation

VII.9	Data Collection and Validation of Newport Beach Hydrogen Station Performance	VII-41
VII.10	California State University Los Angeles Hydrogen Refueling Facility Performance Evaluation and Optimization	VII-43

HyGen Industries

III.10	Development of a Centrifugal Hydrogen Pipeline Gas Compressor	III-48
--------	---	--------

IBIS Associates, Inc.

V.K.1	Low-Cost PEM Fuel Cell Metal Bipolar Plates	V-231
-------	---	-------

IdaTech, LLC

X.3	Accelerating Acceptance of Fuel Cell Backup Power Systems	X-13
-----	---	------

Illinois Institute of Technology

II.A.5	Economical Production of Hydrogen through Development of Novel, High Efficiency Electrocatalysts for Alkaline Membrane Electrolysis	II-26
V.A.8	Synthesis and Characterization of Mixed-Conducting Corrosion Resistant Oxide Supports	V-50
V.I.1	Novel Materials for High Efficiency Direct Methanol Fuel Cells	V-216

Indiana University Purdue University

V.C.2	Rationally Designed Catalyst Layers for PEMFC Performance Optimization	V-95
-------	--	------

InnovaTek

V.J.1	Power Generation from an Integrated Biomass Reformer and Solid Oxide Fuel Cell (SBIR Phase III Xlerator Program)	V-227
-------	--	-------

Ion Power Inc.

V.B.3	Corrugated Membrane Fuel Cell Structures	V-86
V.D.1	Durability Improvements through Degradation Mechanism Studies	V-98
V.D.3	Accelerated Testing Validation	V-109

IRD Fuel Cells, LLC

V.A.12	Non-Precious Metal Fuel Cell Cathodes: Catalyst Development and Electrode Structure Design	V-74
V.I.1	Novel Materials for High Efficiency Direct Methanol Fuel Cells	V-216

J. Craig Venter Institute

II.D.4	Hydrogen from Water in a Novel Recombinant Oxygen-Tolerant Cyanobacterial System	II-113
--------	--	--------

Jet Propulsion Laboratory

IV.B.1	Hydrogen Storage Engineering Center of Excellence	IV-29
--------	---	-------

Jet Propulsion Laboratory (Continued)

- V.A.3 Nanosegregated Cathode Catalysts with Ultra-Low Platinum Loading V-19

Johns Hopkins University

- V.C.1 High-Performance, Durable, Low-Cost Membrane Electrode Assemblies for Transportation Applications V-90

Johnson Matthey Fuel Cells

- V.A.4 Contiguous Platinum Monolayer Oxygen Reduction Electrocatalysts on High-Stability Low-Cost Supports V-26
- V.A.10 High-Activity Dealloyed Catalysts V-61
- V.C.2 Rationally Designed Catalyst Layers for PEMFC Performance Optimization. V-95
- V.F.4 Transport Studies Enabling Efficiency Optimization of Cost-Competitive Fuel Cell Stacks V-159
- V.I.2 Advanced Materials and Concepts for Portable Power Fuel Cells V-220

Kelvin Hecht

- VIII.1 Fuel Cell Technologies National Codes and Standards Development and Outreach VIII-7

Kettering University

- V.G.3 Roots Air Management System with Integrated Expander. V-170

Lawrence Berkeley National Laboratory

- IV.C.3 Hydrogen Storage in Metal-Organic Frameworks. IV-89
- V.C.1 High-Performance, Durable, Low-Cost Membrane Electrode Assemblies for Transportation Applications V-90
- V.D.1 Durability Improvements through Degradation Mechanism Studies V-98
- V.D.3 Accelerated Testing Validation V-109
- V.F.1 Fuel Cell Fundamentals at Low and Subzero Temperatures V-141
- V.F.4 Transport Studies Enabling Efficiency Optimization of Cost-Competitive Fuel Cell Stacks V-159
- V.H.7 A Total Cost of Ownership Model for Design and Manufacturing Optimization of Fuel Cells in Stationary and Emerging Market Applications V-207

Lawrence Livermore National Laboratory

- II.C.4 Characterization and Optimization of Photoelectrode Surfaces for Solar-to-Chemical Fuel Conversion. II-84
- III.8 Rapid High-Pressure Liquid Hydrogen Refueling for Maximum Range and Dormancy. III-42

Lehigh University

- V.N.3 Gas Transport Across Hyperthin Membranes V-251

Linde LLC

- III.8 Rapid High-Pressure Liquid Hydrogen Refueling for Maximum Range and Dormancy. III-42
- VII.11 Performance Evaluation of Delivered Hydrogen Fueling Stations VII-45

Los Alamos National Laboratory

- II.C.6 Photoelectrochemical Material Synthesis at LANL II-93
- IV.B.1 Hydrogen Storage Engineering Center of Excellence IV-29
- IV.B.4 Chemical Hydride Rate Modeling, Validation, and System Demonstration. IV-53
- IV.E.1 Fluid Phase Chemical Hydrogen Storage Materials IV-131
