FY 2016

PROGRESS REPORT FOR THE DOE

HYDROGEN AND FUEL CELLS PROGRAM

February 2017
DOE/GO-102017-4891

Approved by Sunita Satyapal, Director, Hydrogen and Fuel Cells Program

NOTICE

This report was prepared as an account of work sponsored by an agency of the United States government. Neither the United States government nor any agency thereof, nor any of their employees, makes any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States government or any agency thereof. The views and opinions of authors expressed herein do not necessarily state or reflect those of the United States government or any agency thereof.

Available electronically at SciTech Connect <http://www.osti.gov/scitech>

Available for a processing fee to U.S. Department of Energy
and its contractors, in paper, from:

U.S. Department of Energy
Office of Scientific and Technical Information
P.O. Box 62
Oak Ridge, TN 37831-0062
OSTI <http://www.osti.gov>
Phone: 865.576.8401
Fax: 865.576.5728
Email: reports@osti.gov

Available for sale to the public, in paper, from:

U.S. Department of Commerce
National Technical Information Service
5301 Shawnee Road
Alexandria, VA 22312
NTIS <http://www.ntis.gov>
Phone: 800.553.6847 or 703.605.6000
Fax: 703.605.6900
Email: orders@ntis.gov

Printed on paper containing at least 50% wastepaper, including 20% postconsumer waste

Outline

- I. Introduction
- II. Hydrogen Production
 - II.0 Hydrogen Production Program Overview
 - II.A Hydrogen Production Analysis
 - II.A.1 Strategic Analysis, Inc.: Hydrogen Pathways Analysis for H₂ Production via a Monolithic Piston Reforming Reactor and Reformer-Electrolyzer-Purifier Technology
 - II.B Electrolysis
 - II.B.1 National Renewable Energy Laboratory: Renewable Electrolysis Integrated System Development and Testing
 - II.B.2 Giner, Inc.: High-Performance, Long-Lifetime Catalysts for Proton Exchange Membrane Electrolysis
 - II.B.3 Proton OnSite: High Performance Platinum Group Metal Free Membrane Electrode Assemblies through Control of Interfacial Processes
 - II.B.4 Giner, Inc.: High Temperature, High Pressure Electrolysis
 - II.B.5 FuelCell Energy: Solid Oxide Based Electrolysis and Stack Technology with Ultra-High Electrolysis Current Density (>3A/cm²) and Efficiency
 - II.B.6 Proton OnSite: Economical Production of Hydrogen Through Development of Novel, High Efficiency Electrocatalysts for Alkaline Membrane Electrolysis
 - II.B.7 Tetramer Technologies, LLC: New Approaches to Improved PEM Electrolyzer Ion Exchange Membranes
 - II.C High-Temperature Thermochemical
 - II.C.1 Sandia National Laboratories: High Efficiency Solar Thermochemical Reactor for Hydrogen Production
 - II.C.2 University of Colorado Boulder: Flowing Particle Bed Solarthermal RedOx Process to Split Water
 - II.C.3 Savannah River National Laboratory: Electrolyzer Component Development for the HyS Thermochemical Cycle
 - II.C.4 University of Colorado Boulder: NSF/DOE Solar Hydrogen Fuel: Accelerated Discovery of Advanced RedOx Materials for Solar Thermal Water Splitting to Produce Renewable Hydrogen
 - II.D Photoelectrochemical
 - II.D.1 National Renewable Energy Laboratory: High-Efficiency Tandem Absorbers for Economical Solar Hydrogen Production
 - II.D.2 University of Hawaii: Wide Bandgap Chalcopyrite Photoelectrodes for Direct Solar Water Splitting
 - II.D.3 University of California, Irvine: Tandem Particle-Slurry Batch Reactors for Solar Water Splitting
 - II.E Biological
 - II.E.1 National Renewable Energy Laboratory: Biomass to Hydrogen
 - II.E.2 Virginia Polytechnic Institute and State University: Sweet Hydrogen: High-Yield Production of Hydrogen from Biomass Sugars Catalyzed by in vitro Synthetic Biosystems
 - II.E.3 Oregon State University: Novel Hybrid Microbial Electrochemical System for Efficient Hydrogen Generation from Biomass
 - II.F Separations
 - II.F.1 Pacific Northwest National Laboratory: Monolithic Piston-Type Reactor for Hydrogen Production through Rapid Swing of Reforming/Combustion Reactions
 - II.F.2 FuelCell Energy, Inc.: Reformer-Electrolyzer-Purifier (REP) for Production of Hydrogen [CO₂ Pump]
- III. Hydrogen Delivery
 - III.0 Hydrogen Delivery Program Overview
 - III.1 Argonne National Laboratory: Hydrogen Delivery Infrastructure Analysis
 - III.2 Sandia National Laboratories: Fatigue Performance of High-Strength Pipeline Steels and Their Welds in Hydrogen Gas Service

III. Hydrogen Delivery (Continued)

- III.3 Oak Ridge National Laboratory: Vessel Design and Fabrication Technology for Stationary High-Pressure Hydrogen Storage
- III.4 Southwest Research Institute: Hydrogen Compression Application of the Linear Motor Reciprocating Compressor (LMRC)
- III.5 Oak Ridge National Laboratory: Steel Concrete Composite Vessel for 875 bar Stationary Hydrogen Storage
- III.6 Wiretough Cylinders: Low Cost Hydrogen Storage at 875 Bar Using Steel Liner and Steel Wire Wrap
- III.7 Gas Technology Institute: Compressor-Less Hydrogen Refueling Station Using Thermal Compression
- III.8 GVD Corporation: Advanced Barrier Coatings for Harsh Environments
- III.9 National Renewable Energy Laboratory: Improved Hydrogen Liquefaction through Heisenberg Vortex Separation of Para and Ortho-hydrogen
- III.10 Pacific Northwest National Laboratory: Magnetocaloric Hydrogen Liquefaction
- III.11 National Renewable Energy Laboratory: 700 bar Hydrogen Dispenser Hose Reliability Improvement
- III.12 NanoSonic, Inc.: Cryogenically Flexible, Low Permeability H₂ Delivery Hose
- III.13 Argonne National Laboratory: Hydrogen Fueling Station Precooling Analysis
- III.14 National Renewable Energy Laboratory: H2FIRST—Consolidation
- III.15 Lawrence Livermore National Laboratory: Cryo-Compressed Pathway Analysis (2016)

IV. Hydrogen Storage

IV.0 Hydrogen Storage Program Overview

IV.A Analysis

- IV.A.1 Argonne National Laboratory: System Analysis of Physical and Materials-Based Hydrogen Storage
- IV.A.2 Strategic Analysis, Inc.: Hydrogen Storage Cost Analysis

IV.B System Engineering

- IV.B.1 Savannah River National Laboratory: Hydrogen Storage Engineering Center of Excellence
- IV.B.2 National Renewable Energy Laboratory: Hydrogen Storage System Modeling: Public Access, Maintenance, and Enhancements
- IV.B.3 Savannah River National Laboratory: Investigation of Metal and Chemical Hydrides for Hydrogen Storage in Novel Fuel Cell Systems

IV.C Advanced Materials

- IV.C.1 Sandia National Laboratories: HyMARC: A Consortium for Advancing Solid-State Hydrogen Storage Materials
- IV.C.2 Sandia National Laboratories: Hydrogen Storage Materials Advanced Research Consortium: Sandia Effort
- IV.C.3 Lawrence Livermore National Laboratory: HyMARC: Hydrogen Storage Materials Advanced Research Consortium (LLNL Effort)
- IV.C.4 Lawrence Berkeley National Laboratory: HyMARC: A Consortium for Advancing Solid-State Hydrogen Storage Materials
- IV.C.5 Lawrence Livermore National Laboratory: Improving the Kinetics and Thermodynamics of Mg(BH₄)₂ for Hydrogen Storage
- IV.C.6 Ames Laboratory: High-capacity Hydrogen Storage Systems via Mechanochemistry
- IV.C.7 National Renewable Energy Laboratory: H₂ Storage Characterization and Optimization Research Efforts
- IV.C.8 California Institute of Technology: Design and Synthesis of Materials with High Capacities for Hydrogen Physisorption
- IV.C.9 Texas A&M University: High-Capacity and Low-Cost Hydrogen-Storage Sorbents for Automotive Applications
- IV.C.10 University of Michigan: Hydrogen Adsorbents with High Volumetric Density: New Materials and System Projections
- IV.C.11 Savannah River National Laboratory: Electrochemical Reversible Formation of Alane

- IV. Hydrogen Storage (Continued)
 - IV.C Advanced Materials (Continued)
 - IV.C.12 Ardica Technologies, Inc.: Low-Cost α -Alane for Hydrogen Storage
 - IV.D Advanced Tanks
 - IV.D.1 Pacific Northwest National Laboratory: Enhanced Materials and Design Parameters for Reducing the Cost of Hydrogen Storage Tanks
 - IV.D.2 Lawrence Livermore National Laboratory: Thermomechanical Cycling of Thin Liner High Fiber Fraction Cryogenic Pressure Vessels Rapidly Refueled by Liquid Hydrogen Pump to 700 Bar
 - IV.D.3 Center for Transportation and the Environment: Conformable Hydrogen Storage Pressure Vessel Project
 - IV.D.4 Materia, Inc.: Next Generation Hydrogen Storage Vessels Enabled by Carbon Fiber Infusion with a Low Viscosity, High Toughness System
 - IV.D.5 Composite Technology Development, Inc.: Optimizing the Cost and Performance of Composite Cylinders for H₂ Storage using a Graded Construction
 - IV.D.6 PPG Industries: Achieving Hydrogen Storage Goals through High-Strength Fiber Glass
 - IV.D.7 Oak Ridge National Laboratory: Melt Processable PAN Precursor for High Strength, Low-Cost Carbon Fibers (Phase II)
 - IV.D.8 Sandia National Laboratories: Innovative Development, Selection and Testing to Reduce Cost and Weight of Materials for BOP Components
- V. Fuel Cells
 - V.0 Fuel Cells Program Overview
 - V.A Catalysts & Electrodes
 - V.A.1 Los Alamos National Laboratory: Non-Precious Metal Fuel Cell Cathodes: Catalyst Development and Electrode Structure Design
 - V.A.2 University of New Mexico: Development of PGM-free Catalysts for Hydrogen Oxidation Reaction in Alkaline Media
 - V.A.3 Northeastern University: Innovative Non-PGM Catalysts for High-Temperature PEMFCs
 - V.A.4 Argonne National Laboratory: Tailored High Performance Low-PGM Alloy Cathode Catalysts
 - V.A.5 Brookhaven National Laboratory: Platinum Monolayer Electrocatalysts
 - V.A.6 National Renewable Energy Laboratory: Extended Surface Electrocatalyst Development
 - V.A.7 3M Company: Highly Active, Durable, and Ultra-low PGM NSTF Thin Film ORR Catalysts and Supports
 - V.A.8 General Motors Company: Highly-Accessible Catalysts for Durable High-Power Performance
 - V.A.9 Illinois Institute of Technology: Corrosion-Resistant Non-Carbon Electrocatalyst Supports for PEFCs
 - V.B Fuel Cell Performance & Durability
 - V.B.1 Los Alamos National Laboratory: Fuel Cell-Performance and Durability (FC-PAD) Consortium Overview
 - V.B.2 Argonne National Laboratory: FC-PAD Fuel Cell – Performance and Durability Electrocatalysts and Supports
 - V.B.3 National Renewable Energy Laboratory: FC-PAD: Electrode Layer Integration
 - V.B.4 Lawrence Berkeley National Laboratory: FC-PAD: Ionomer, GDLs, Interfaces
 - V.B.5 Los Alamos National Laboratory: FC-PAD: Modeling, Evaluation, Characterization
 - V.B.6 Lawrence Berkeley National Laboratory: Multiscale Modeling of Fuel Cell Membranes
 - V.B.7 Hawaii Natural Energy Institute: The Effect of Airborne Contaminants on Fuel Cell Performance and Durability
 - V.C Membranes/Electrolytes
 - V.C.1 3M Company: New Fuel Cell Membranes with Improved Durability and Performance
 - V.C.2 Colorado School of Mines: Advanced Hybrid Membranes for Next Generation PEMFC Automotive Applications
 - V.C.3 FuelCell Energy, Inc.: Smart Matrix Development for Direct Carbonate Fuel Cell

- V. Fuel Cells (Continued)
 - V.C Membranes/Electrolytes (Continued)
 - V.C.4 Giner, Inc.: Ionomer Dispersion Impact on Fuel Cell and Electrolyzer Performance and Durability (SBIR)
 - V.C.5 University of Delaware: Highly Stable Anion-Exchange Membranes for High-Voltage Redox-Flow Batteries
 - V.C.6 Los Alamos National Laboratory: Advanced Materials for Fully-Integrated MEAs in AEMFCs
 - V.C.7 National Renewable Energy Laboratory: Advanced Ionomers and MEAs for Alkaline Membrane Fuel Cells
 - V.C.8 Giner, Inc.: Dimensionally Stable High Performance Membranes (SBIR)
 - V.C.9 Amsen Technologies LLC: Low-Cost Proton Conducting Membranes for PEM Fuel Cells (SBIR)
 - V.C.10 NanoSonic Inc.: Novel Hydrocarbon Ionomers for Durable Proton Exchange Membranes (SBIR)
 - V.C.11 NEI Corporation: Novel Nanocomposite Polymer Electrolyte Membranes for Fuel Cells (SBIR)
 - V.D MEAs, Cells, and Other Stack Components
 - V.D.1 3M Company: High Performance, Durable, Low Cost Membrane Electrode Assemblies for Transportation Applications
 - V.D.2 TreadStone Technologies, Inc.: Novel Structured Metal Bipolar Plates for Low Cost Manufacturing (SBIR)
 - V.D.3 Argonne National Laboratory: Rationally Designed Catalyst Layers for PEMFC Performance Optimization
 - V.D.4 Redox Power Systems, Inc.: Affordable, High Performance, Intermediate Temperature Solid Oxide Fuel Cells
 - V.D.5 Advent Technologies, Inc.: Facilitated Direct Liquid Fuel Cells with High Temperature Membrane Electrode Assemblies
 - V.D.6 Giner, Inc.: Advanced Catalysts and Membrane Electrode Assemblies (MEAs) for Reversible Alkaline Membrane Fuel Cells
 - V.E Fuel Cell System
 - V.E.1 pH Matter, LLC: Regenerative Fuel Cell System
 - V.F Testing and Technical Assessment
 - V.F.1 Oak Ridge National Laboratory: New Fuel Cell Materials: Characterization and Method Development
 - V.F.2 National Institute of Standards and Technology: Neutron Imaging Study of the Water Transport in Operating Fuel Cells
 - V.F.3 Los Alamos National Laboratory: Technical Assistance to Developers
 - V.F.4 National Renewable Energy Laboratory: Fuel Cell Technology Status: Degradation
 - V.F.5 Argonne National Laboratory: Performance and Durability of Advanced Automotive Fuel Cell Stacks and Systems with Nanostructured Thin Film Catalyst Based Membrane Electrode Assemblies
 - V.F.6 Strategic Analysis, Inc.: Fuel Cell Vehicle and Bus Cost Analysis
 - V.F.7 Battelle: Stationary and Emerging Market Fuel Cell System Cost Analysis--Primary Power and Combined Heat and Power Applications
 - V.F.8 Lawrence Berkeley National Laboratory: A Total Cost of Ownership Model for Design and Manufacturing Optimization of Fuel Cells in Stationary and Emerging Market Applications
 - V.G Basic Energy Sciences
 - V.G.1 Brookhaven National Laboratory: Structure and Function in Electrocatalysis of Reactions for Direct Energy Conversion
 - V.G.2 Brookhaven National Laboratory: Catalysis and Electrocatalysis for Advanced Fuel Synthesis: Hydrogen Production and the Water-Gas Shift
 - V.G.3 John Hopkins University: Control of Reactivity in Nanoporous Metal/Ionic Liquid Composite Catalysts
 - V.G.4 Pacific Northwest National Laboratory: Multifunctional Catalysis to Synthesize and Utilize Energy Carriers
 - V.G.5 Texas A&M University: Modeling Catalyzed Growth of Single Walled Carbon Nanotubes

V. Fuel Cells (Continued)

V.G Basic Energy Sciences (Continued)

- V.G.6 University of Connecticut: Room Temperature Electrochemical Upgrading of Methane to Oxygenate Fuels
- V.G.7 Wayne State University: Nanostructured, Targeted Layered Metal Oxides as Active and Selective Heterogeneous Electrocatalysts for Oxygen Evolution
- V.G.8 University of Michigan: Analysis of the Mechanisms of Electrochemical Oxygen Reduction and Development of Ag-alloy and Pt-alloy Electrocatalysis for Low Temperature Fuel Cells
- V.G.9 University of Massachusetts Amherst: Computational Design of Graphene-Nanoparticle Catalysts
- V.G.10 University of Wisconsin: Atomic-Scale Design of Metal and Alloy Catalysts: A Combined Theoretical and Experimental Approach
- V.G.11 University of Houston: Dual Site Requirements for Hydrodeoxygenation of Model Biomass Compounds
- V.G.12 Oak Ridge National Laboratory: Fundamentals of Catalysis and Chemical Transformations
- V.G.13 University of New Mexico: Sub Nanometer Sized Clusters for Heterogeneous Catalysis
- V.G.14 Central Michigan University: Element Specific Atomic Arrangement of Binary and Ternary Alloy Nanosized Catalysts in As-Prepared and Active State
- V.G.15 University of Utah: Thermodynamic, Kinetic and Electrochemical Studies on Mixed Proton, Oxygen Ion and Electron (Hole) Conductors
- V.G.16 University of Chicago: Computer Simulation of Proton Transport in Fuel Cell Membranes
- V.G.17 National Renewable Energy Laboratory: Hydroxide Conductors for Energy Conversion Devices

VI. Manufacturing R&D

- VI.0 Manufacturing R&D Program Overview
- VI.1 National Renewable Energy Laboratory: Fuel Cell Membrane Electrode Assembly Manufacturing R&D
- VI.2 Ohio Fuel Cell Coalition: Clean Energy Supply Chain and Manufacturing Competitiveness Analysis for Hydrogen and Fuel Cell Technologies
- VI.3 Virginia Clean Cities at James Madison University: Fuel Cell and Hydrogen Opportunity Center, www.hfcenexus.com
- VI.4 GLWN – Westside Industrial Retention & Expansion Network: U.S. Clean Energy Hydrogen and Fuel Cell Technologies: A Competitiveness Analysis
- VI.5 Automated Dynamics: Continuous Fiber Composite Electrofusion Coupler
- VI.6 Mainstream Engineering: In-line Quality Control of PEM Materials
- VI.7 National Renewable Energy Laboratory: Manufacturing Competitiveness Analysis for Hydrogen Refueling Stations

VII. Technology Validation

VII.0 Technology Validation Program Overview

VII.A Vehicles

- VII.A.1 National Renewable Energy Laboratory: Fuel Cell Electric Vehicle Evaluation
- VII.A.2 National Renewable Energy Laboratory: Technology Validation: Fuel Cell Bus Evaluations
- VII.A.3 Argonne National Laboratory: Fuel Cell Electric Truck (FCET) Component Sizing
- VII.A.4 Center for Transportation and the Environment: Fuel Cell Hybrid Electric Delivery Van Project

VII.B Hydrogen Fueling Stations

- VII.B.1 National Renewable Energy Laboratory: Hydrogen Station Data Collection and Analysis
- VII.B.2 Gas Technology Institute: Performance Evaluation of Delivered Hydrogen Fueling Stations
- VII.B.3 Proton OnSite: Validation of an Advanced High Pressure PEM Electrolyzer and Composite Hydrogen Storage, with Data Reporting, for SunHydro Stations
- VII.B.4 California State University, Los Angeles: CSULA Hydrogen Refueling Facility Performance Evaluation and Optimization
- VII.B.5 National Renewable Energy Laboratory: Brentwood Case Study

VII. Technology Validation (Continued)

VII.C Hydrogen Infrastructure Support

- VII.C.1 National Renewable Energy Laboratory: Hydrogen Component Validation
- VII.C.2 Sandia National Laboratories: Development of the Hydrogen Station Equipment Performance (HyStEP) Device
- VII.C.3 Air Products and Chemicals, Inc.: Advanced Hydrogen Fueling Station Supply: Tube Trailers
- VII.C.4 Lawrence Livermore National Laboratory: Performance and Durability Testing of Volumetrically Efficient Cryogenic Vessels and High Pressure Liquid Hydrogen Pump
- VII.C.5 National Renewable Energy Laboratory: Hydrogen Meter Benchmark Testing
- VII.C.6 California Fuel Cell Partnership: Station Operational Status System (SOSS) 3.0 Implementation, SOSS 3.1 Upgrade, and Station Map Upgrade Project

VII.D Hydrogen Energy Storage/Grid Integration

- VII.D.1 National Renewable Energy Laboratory: Stationary Fuel Cell Evaluation
- VII.D.2 National Renewable Energy Laboratory: Material Handling Equipment Data Collection and Analysis
- VII.D.3 Idaho National Laboratory: Dynamic Modeling and Validation of Electrolyzers in Real Time Grid Simulation

VIII. Safety, Codes and Standards

- VIII.0 Safety, Codes & Standards Program Overview
- VIII.1 National Renewable Energy Laboratory: National Codes and Standards Deployment and Outreach
- VIII.2 Sandia National Laboratories: R&D for Safety, Codes and Standards: Materials and Components Compatibility
- VIII.3 Los Alamos National Laboratory: Hydrogen Fuel Quality
- VIII.4 Sandia National Laboratories: R&D for Safety, Codes and Standards: Hydrogen Behavior
- VIII.5 Sandia National Laboratories: Hydrogen Quantitative Risk Assessment
- VIII.6 Pacific Northwest National Laboratory: Hydrogen Safety Panel, Safety Knowledge Tools and First Responder Training Resources
- VIII.7 National Renewable Energy Laboratory: NREL Hydrogen Sensor Testing Laboratory
- VIII.8 Fuel Cell & Hydrogen Energy Association: Fuel Cell & Hydrogen Energy Association Codes and Standards Support
- VIII.9 Pacific Northwest National Laboratory: Compatibility of Polymeric Materials Used in the Hydrogen Infrastructure
- VIII.10 Sandia National Laboratories: Enabling Hydrogen Infrastructure Through Science-based Codes and Standards

IX. Systems Analysis

- IX.0 Systems Analysis Program Overview
- IX.1 Argonne National Laboratory: Employment Impacts of Hydrogen and Fuel Cell Technologies
- IX.2 Argonne National Laboratory: Life-Cycle Analysis of Water Consumption for Hydrogen Production
- IX.3 Argonne National Laboratory: Impact of Fuel Cell and H₂ Storage Improvements on FCEVs
- IX.4 Sandia National Laboratories: Hydrogen Analysis with the Sandia ParaChoice Model
- IX.5 Argonne National Laboratory: Life Cycle Analysis of Emerging Hydrogen Production Technologies
- IX.6 University of Tennessee: Policies to Promote Alternative Fuel Vehicles
- IX.7 National Renewable Energy Laboratory: Sustainability Analysis of Hydrogen Supply and Stationary Fuel Cell Systems Using the Hydrogen Regional Sustainability (HyReS) Framework
- IX.8 National Renewable Energy Laboratory: Evaluation of Technology Status Compared to Program Targets
- IX.9 National Renewable Energy Laboratory: Expanded Capabilities for the Hydrogen Financial Analysis Scenario Tool
- IX.10 University of Chicago: The Business Case for Hydrogen-powered Passenger Cars: Competition and Solving the Infrastructure Puzzle
- IX.11 National Renewable Energy Laboratory: National FCEV and Hydrogen Fueling Station Scenarios

- X. Market Transformation
 - X.0 Market Transformation Program Overview
 - X.1 Hawaii Natural Energy Institute: Hydrogen Energy Systems as a Grid Management Tool
 - X.2 Plug Power: Ground Support Equipment Demonstration
 - X.3 Sandia National Laboratories: Maritime Fuel Cell Generator Project
 - X.4 Pacific Northwest National Laboratory: Demonstration of Fuel Cell Auxiliary Power Units (APUs) to Power Truck Refrigeration Units (TRUs) in Refrigerated Trucks
 - X.5 Federal Express Corporation: FedEx Express Hydrogen Fuel Cell Extended-Range Battery Electric Vehicles
- XI. Small Business Innovation Research (SBIR) Fuel Cell Technologies Office New Projects Awarded in FY 2016
 - XI.0 Small Business Innovation Research (SBIR) Fuel Cell Technologies Office New Projects Awarded in FY 2016
 - Phase I Projects
 - XI.1 General Engineering & Research, LLC: Development of Low Cost Magnetocaloric Nanomaterials for Sub 80 K Refrigeration Applications
 - XI.2 Nanohmics, Inc.: Development of Next-Generation Magnetocaloric Materials
 - XI.3 Giner, Inc.: High Charge Density Hydrocarbon-Based PEMs
 - XI.4 NanoSonic, Inc.: Novel Hydrocarbon Ionomers for Durable Proton Exchange Membranes
 - XI.5 NEI Corporation: Novel Nanocomposite Polymer Electrolyte Membranes for Fuel Cells
 - XI.6 Amsen Technologies LLC: Low-Cost Proton Conducting Membranes for PEM Fuel Cells
 - Phase II Projects
 - XI.7 Mainstream Engineering Corporation: Cross-Polarized Near-UV/Vis Detector for In-line Quality Control of PEM Materials
 - XI.8 Sustainable Innovations, LLC: Hydrogen Contamination Detection
 - XI.9 PH Matter, LLC: Regenerative Fuel Cell System
 - XI.10 Proton Energy Systems: Economical Production of Hydrogen Through Development of Novel, High Efficiency Electrocatalysts for Alkaline Membrane Electrolysis
 - XI.11 Southwest Sciences, Inc.: Diode Laser Sensor for Contaminants in Hydrogen Fuel
- XII. Acronyms, Abbreviations, and Definitions
- XIII. Primary Contacts Index
- XIV. Hydrogen and Fuel Cells Program Contacts
- XV. Project Listings by State
- XVI. Project Listings by Organization
