

Dr. Inês Azevedo

Professor, Department of Engineering and Public Policy
Carnegie Mellon University

Inês Azevedo is a Professor in the Department of Engineering and Public Policy at Carnegie Mellon University. She is also a principal investigator and co-director for the Climate and Energy Decision Making Center at Carnegie Mellon. Dr. Azevedo's research interests lie at the intersection of behavioral and decision making, and environmental, technical, and economic issues, such as how to address the challenge of climate change and move toward a more sustainable energy system. She addresses complex problems in which traditional engineering plays an important role but cannot provide a complete answer. She has participated in several reports from the National Research Council from the National Academy of Sciences. She has published more than 200 peer-reviewed papers, presentations, and articles on energy issues, and was selected by the World Economic Forum (WEF) as one of the "40 Young Scientists Under 40" in 2014. In 2017 she received a Clean Energy Education and Empowerment (C3E) Award for her outstanding leadership and accomplishments in clean energy research.
