1000 Independence Avenue, S.W.  
Washington, DC 20585-0121

**FY 2017**

**PROGRESS REPORT FOR THE DOE**

**HYDROGEN AND FUEL CELLS PROGRAM**

May 2018  
DOE/GO-102017-5042

Approved by Sunita Satyapal, Director, Hydrogen and Fuel Cells Program

# Outline

- I. Introduction
- II. Hydrogen Production
  - II.0 Hydrogen Production Sub-Program Overview
  - II.A Hydrogen Production Analysis
    - II.A.1 Strategic Analysis, Inc.: Analysis of Advanced H<sub>2</sub> Production Pathways
  - II.B Electrolysis
    - II.B.1 National Renewable Energy Laboratory: Renewable Electrolysis Integrated Systems Development and Testing
    - II.B.2 Giner, Inc.: High-Performance, Long-Lifetime Catalysts for Proton Exchange Membrane Electrolysis
    - II.B.3 Proton OnSite: High Performance Platinum Group Metal Free Membrane Electrode Assemblies through Control of Interfacial Processes
    - II.B.4 Giner, Inc.: High Temperature Alkaline Water Electrolysis
    - II.B.5 FuelCell Energy, Inc.: Solid Oxide Based Electrolysis and Stack Technology with Ultra-High Electrolysis Current Density (>3 A/cm<sup>2</sup>) and Efficiency
    - II.B.6 Proton OnSite: Economical Production of Hydrogen through Development of Novel, High Efficiency Electrocatalysts for Alkaline Membrane Electrolysis
    - II.B.7 Tetramer Technologies, LLC: New Approaches to Improved PEM Electrolyzer Ion Exchange Membranes
    - II.B.8 Ceramatec: Multi-Scale Ordered Cell Structure for Cost Effective Production of Hydrogen by HTWS
  - II.C High-Temperature Thermochemical
    - II.C.1 Sandia National Laboratories: High Efficiency Solar Thermochemical Reactor for Hydrogen Production
    - II.C.2 University of Colorado Boulder: Flowing Particle Bed Solarthermal Redox Process to Split Water
  - II.D Photoelectrochemical
    - II.D.1 National Renewable Energy Laboratory: High-Efficiency Tandem Absorbers for Economical Solar Hydrogen Production
    - II.D.2 University of Hawaii: Wide Bandgap Chalcopyrite Photoelectrodes for Direct Solar Water Splitting
    - II.D.3 University of California, Irvine: Tandem Particle-Slurry Batch Reactors for Solar Water Splitting
  - II.E Biological
    - II.E.1 National Renewable Energy Laboratory: Biomass to Hydrogen (B2H2)
    - II.E.2 Virginia Polytechnic Institute and State University: Sweet Hydrogen: High-Yield Production of Hydrogen from Biomass Sugars Catalyzed by in vitro Synthetic Biosystems
    - II.E.3 Oregon State University: Novel Hybrid Microbial Electrochemical System for Efficient Hydrogen Generation from Biomass
  - II.F Basic Energy Sciences
    - II.F.1 University of California, Irvine: Tailoring Hydrogen Evolution Reaction (HER) Catalysts for Operation at Specific pH Values
    - II.F.2 University of Southern California: Hybrid Perovskites and Non-Adiabatic Dynamics Simulations: Catching Realistic Aspects of the Charge Recombination Process
    - II.F.3 University of Rochester: Nano-bio Systems for Light-Driven Hydrogen Production
    - II.F.4 National Renewable Energy Laboratory: Mechanistic Investigations on Hydrogen Catalysis by [FeFe]-Hydrogenase
    - II.F.5 National Renewable Energy Laboratory: Bioenergetics of Photosynthetic Energy Transduction: Control of Pathways through Redox Biochemistry
    - II.F.6 Brookhaven National Laboratory: Reversible Conversion between CO<sub>2</sub>/H<sub>2</sub> and Formic Acid by Molecular Catalysts

### III. Hydrogen Delivery

- III.0 Hydrogen Delivery Sub-Program Overview
- III.1 Sandia National Laboratories: Fatigue Performance of High-Strength Pipeline Steels and Their Welds in Hydrogen Gas Service
- III.2 Southwest Research Institute: Hydrogen Compression Application of the Linear Motor Reciprocating Compressor (LMRC)
- III.3 Wiretough Cylinders, LLC: Low Cost Hydrogen Storage at 875 bar Using Steel Liner and Steel Wire Wrap
- III.4 GVD Corporation: Advanced Barrier Coatings for Harsh Environments
- III.5 National Renewable Energy Laboratory: Improved Hydrogen Liquefaction through Heisenberg Vortex Separation of para- and ortho-hydrogen
- III.6 Pacific Northwest National Laboratory: Magnetocaloric Hydrogen Liquefaction
- III.7 National Renewable Energy Laboratory: 700 bar Hydrogen Dispenser Hose Reliability and Improvement
- III.8 Nanosonic, Inc.: Cryogenically Flexible, Low Permeability H<sub>2</sub> Delivery Hose
- III.9 Argonne National Laboratory: Hydrogen Refueling Analysis of Heavy Duty Fuel Cell Vehicle Fleets
- III.10 Lawrence Livermore National Laboratory: Liquid Hydrogen Infrastructure Analysis
- III.11 Giner, Inc.: Electrochemical Compression
- III.12 Greenway Energy, LLC: Hybrid Electrochemical Hydrogen/Metal Hydride Compressor
- III.13 Sandia National Laboratories: Metal Hydride Compression
- III.14 Ivys Energy Solutions: Advancing Hydrogen Dispenser Technologies by Using Innovative Intelligent Network
- III.15 National Renewable Energy Laboratory: H2FIRST Consolidation
- III.16 Sandia National Laboratories: Reference Station Design, Phase II

### IV. Hydrogen Storage

- IV.0 Hydrogen Storage Sub-Program Overview
- IV.A Analysis
  - IV.A.1 Argonne National Laboratory: System Analysis of Physical and Materials-Based Hydrogen Storage
  - IV.A.2 Strategic Analysis, Inc.: Hydrogen Storage Cost Analysis
- IV.B System Engineering
  - IV.B.1 National Renewable Energy Laboratory: Hydrogen Storage System Modeling: Public Access, Maintenance, and Enhancements
  - IV.B.2 Savannah River National Laboratory: Investigation of Solid State Hydrides for Autonomous Fuel Cell Vehicles
- IV.C Advanced Materials
  - IV.C.1 Sandia National Laboratories: HyMARC (Core): SNL Effort
  - IV.C.2 Lawrence Livermore National Laboratory: HyMARC (Core): LLNL Effort
  - IV.C.3 Lawrence Berkeley National Laboratory: HyMARC (Core): LBNL Effort
  - IV.C.4 National Renewable Energy Laboratory: HyMARC (Support): NREL Effort
  - IV.C.5 Pacific Northwest National Laboratory: HyMARC (Support): PNNL Effort
  - IV.C.6 Lawrence Berkeley National Laboratory: HyMARC (Support): LBNL Effort
  - IV.C.7 Liox Power: HyMARC Seedling: Electrolyte Assisted Hydrogen Storage Reactions
  - IV.C.8 The Pennsylvania State University: HyMARC Seedling: Developing a Novel Hydrogen Sponge with Ideal Binding Energy and High Surface Area for Practical Hydrogen Storage
  - IV.C.9 Argonne National Laboratory: HyMARC Seedling: “Graphene-Wrapped” Complex Hydrides as High-Capacity, Regenerable Hydrogen Storage Materials
  - IV.C.10 University of Missouri–St. Louis: HyMARC Seedling: Fundamental Studies of Surface-Functionalized Mesoporous Carbons for Thermodynamic Stabilization and Reversibility of Metal Hydrides
  - IV.C.11 University of Hawaii at Manoa: HyMARC Seedling: Development of Magnesium Boride Etherates as Hydrogen Storage Materials

## IV. Hydrogen Storage (Continued)

## IV.C Advanced Materials (Continued)

- IV.C.12 Lawrence Livermore National Laboratory: Improving the Kinetics and Thermodynamics of  $\text{Mg}(\text{BH}_4)_2$  for Hydrogen Storage
- IV.C.13 Ames Laboratory: High-Capacity Hydrogen Storage Systems via Mechanochemistry
- IV.C.14 California Institute of Technology: Design and Synthesis of Materials with High Capacities for Hydrogen Physisorption
- IV.C.15 University of Michigan: Hydrogen Adsorbents with High Volumetric Density: New Materials and System Projections
- IV.C.16 Savannah River National Laboratory: Electrochemical Reversible Formation of Alane
- IV.C.17 Ardica Technologies, Inc.: Low-Cost  $\alpha$ -Alane for Hydrogen Storage

## IV.D Advanced Tanks

- IV.D.1 Center for Transportation and the Environment: Conformable Hydrogen Storage Coil Reservoir
- IV.D.2 Materia, Inc.: Next Generation Hydrogen Storage Vessels Enabled by Carbon Fiber Infusion with a Low Viscosity, High Toughness Resin System
- IV.D.3 Sandia National Laboratories: Development, Selection and Testing to Reduce Cost and Weight of Materials for BOP Components
- IV.D.4 VENCORE Solutions and Services: Integrated Insulation System for Automotive Cryogenic Storage Tanks

## V. Fuel Cells

## V.0 Fuel Cells Sub-Program Overview

## V.A Catalysts &amp; Electrodes

- V.A.1 Los Alamos National Laboratory: ElectroCat (Electrocatalysis Consortium)
- V.A.2 University of New Mexico: Development of PGM-Free Catalysts for Hydrogen Oxidation Reaction in Alkaline Media
- V.A.3 Northeastern University: Innovative Non-PGM Catalysts for High-Temperature PEMFCs
- V.A.4 Argonne National Laboratory: Tailored High-Performance Low-PGM Alloy Cathode Catalysts
- V.A.5 Brookhaven National Laboratory: Platinum Monolayer Electrocatalysts
- V.A.6 National Renewable Energy Laboratory: Extended Surface Electrocatalyst Development
- V.A.7 3M Company: Highly Active, Durable, and Ultra-Low PGM NSTF Thin Film ORR Catalysts and Supports
- V.A.8 General Motors: Highly Accessible Catalysts for Durable High-Power Performance
- V.A.9 Washington University at St. Louis: Corrosion-Resistant Non-Carbon Electrocatalyst Supports for PEFCs
- V.A.10 pH Matter LLC: Regenerative Fuel Cell System (SBIR Phase II)
- V.A.11 Greenway Energy, LLC: Development of Corrosion Resistant Carbon (CRC) Support for Ultra-Low Platinum Group Metal (PGM) Catalysts (SBIR Phase I)
- V.A.12 Certaintech, Inc.: Mesoporous Non-Carbon Catalyst Supports of PEMFC (SBIR I)
- V.A.13 Pajarito Powder: Development of Durable Active Supports for Low Platinum Group Metal Catalysts (SBIR I)
- V.A.14 pH Matter LLC: Multi-Functional Catalyst Support (SBIR I)
- V.A.15 Forge Nano: Highly Robust Low PGM MEAs Based upon Composite Supports (SBIR I)
- V.A.16 Los Alamos National Laboratory: Advanced Electro-Catalysts through Crystallographic Enhancement
- V.A.17 Ford Motor Company: Vapor Deposition Process for Engineering of Dispersed PEMFC ORR  $\text{Pt}/\text{NbO}_x/\text{C}$  Catalysts

## V.B Fuel Cell Performance &amp; Durability

- V.B.1 Los Alamos National Laboratory: FC-PAD: Fuel Cell Performance and Durability Consortium
- V.B.2 Oak Ridge National Laboratory: FC-PAD: Components and Characterization
- V.B.3 Lawrence Berkeley National Laboratory: FC-PAD: Electrode Layers and Optimization

- V. Fuel Cells (Continued)
  - V.B Fuel Cell Performance & Durability (Continued)
    - V.B.4 3M Company: Novel Ionomers and Electrode Structures for Improved PEMFC Electrode Performance at Low PGM Loadings
    - V.B.5 General Motors: Durable High-Power Membrane Electrode Assemblies with Low Pt Loading
    - V.B.6 United Technologies Research Center: High Performance Polymer Electrolyte Membrane Fuel Cell Electrode Structures
    - V.B.7 Vanderbilt University: Fuel Cell Membrane Electrode Assemblies with Ultra-Low Pt Nanofiber Electrodes
  - V.C Membranes/Electrolytes
    - V.C.1 3M Company: New Fuel Cell Membranes with Improved Durability and Performance
    - V.C.2 Colorado School of Mines: Advanced Hybrid Membranes for Next Generation PEMFC Automotive Applications
    - V.C.3 FuelCell Energy, Inc.: Smart Matrix Development for Direct Carbonate Fuel Cell
    - V.C.4 Giner, Inc.: Ionomer Dispersion Impact on Fuel Cell and Electrolyzer Performance and Durability (SBIR Phase II TTO)
    - V.C.5 University of Delaware: Highly Stable Anion Exchange Membranes for High-Voltage Redox-Flow Batteries
    - V.C.6 Los Alamos National Laboratory: Advanced Materials for Fully-Integrated MEAs in AEMFCs
    - V.C.7 National Renewable Energy Laboratory: Advanced Ionomers and MEAs for Alkaline Membrane Fuel Cells
  - V.D MEAs, Cells, and Other Stack Components
    - V.D.1 TreadStone Technologies, Inc.: Novel Structured Metal Bipolar Plates for Low Cost Manufacturing
    - V.D.2 Advent Technologies, Inc.: Facilitated Direct Liquid Fuel Cells with High Temperature Membrane Electrode Assemblies
    - V.D.3 Giner, Inc.: Advanced Catalysts and Membrane Electrode Assemblies (MEAs) for Reversible Alkaline Membrane Fuel Cells
  - V.E Testing and Technical Assessment
    - V.E.1 National Institute of Standards and Technology: Neutron Imaging Study of the Water Transport in Operating Fuel Cells
    - V.E.2 Los Alamos National Laboratory: Technical Assistance to Developers
    - V.E.3 National Renewable Energy Laboratory: Fuel Cell Technology Status: Degradation
    - V.E.4 Argonne National Laboratory: Performance and Durability of Advanced Automotive Fuel Cell Stacks and Systems with Dispersed Alloy Cathode Catalyst in Membrane Electrode Assemblies
    - V.E.5 Strategic Analysis, Inc.: Fuel Cell Vehicle Cost Analysis
- VI. Manufacturing R&D
  - VI.0 Manufacturing R&D Sub-Program Overview
  - VI.1 National Renewable Energy Laboratory: Fuel Cell Membrane Electrode Assembly Manufacturing R&D
  - VI.2 Ohio Fuel Cell Coalition: Clean Energy Supply Chain and Manufacturing Competitiveness Analysis for Hydrogen and Fuel Cell Technologies
  - VI.3 Virginia Clean Cities at James Madison University: Fuel Cell and Hydrogen Opportunity Center, [www.hfenexus.com](http://www.hfenexus.com) (Hydrogen Fuel Cell Nexus)
  - VI.4 GLWN, Westside Industrial Retention & Expansion Network: U.S. Clean Energy Hydrogen and Fuel Cell Technologies: A Competitiveness Analysis
  - VI.5 Automated Dynamics: Continuous Fiber Composite Electrofusion Coupler
  - VI.6 Mainstream Engineering: In-line Quality Control of PEM Materials
  - VI.7 National Renewable Energy Laboratory: Manufacturing Competitiveness Analysis for Hydrogen Refueling Stations

## VII. Technology Validation

### VII.0 Technology Validation Sub-Program Overview

#### VII.A Vehicles

VII.A.1 National Renewable Energy Laboratory: Fuel Cell Electric Vehicle Evaluation

VII.A.2 National Renewable Energy Laboratory: Technology Validation: Fuel Cell Bus Evaluations

VII.A.3 Center for Transportation and the Environment: Fuel Cell Hybrid Electric Delivery Van Project

#### VII.B Hydrogen Infrastructure

VII.B.1 Electricore: Innovative Advanced Hydrogen Mobile Fueler

VII.B.2 National Renewable Energy Laboratory: Hydrogen Station Data Collection and Analysis

VII.B.3 Gas Technology Institute: Performance Evaluation of Delivered Hydrogen Fueling Stations

VII.B.4 National Renewable Energy Laboratory: Hydrogen Component Validation

VII.B.5 Lawrence Livermore National Laboratory: Liquid Hydrogen Pump Performance and Durability Testing

VII.B.6 National Renewable Energy Laboratory: Hydrogen Meter Benchmark Testing

#### VII.C Hydrogen Energy Storage/Grid Integration

VII.C.1 National Renewable Energy Laboratory: Optimal Stationary Fuel Cell Integration and Control (Energy Dispatch Controller)

VII.C.2 Lawrence Berkeley National Laboratory: Integrated Systems Modeling of the Interactions between Stationary Hydrogen, Vehicles, and Grid Resources

VII.C.3 Idaho National Laboratory: Dynamic Modeling and Validation of Electrolyzers in Real-Time Grid Simulation

VII.C.4 FuelCell Energy, Inc.: Modular SOEC System for Efficient Hydrogen Production at High Current Density

#### VII.D H2@Scale

VII.D.1 National Renewable Energy Laboratory: H2@Scale Analysis

VII.D.2 Idaho National Laboratory: High-temperature Electrolysis Test Stand

## VIII. Safety, Codes and Standards

### VIII.0 Safety, Codes & Standards Sub-Program Overview

VIII.1 National Renewable Energy Laboratory: National Codes and Standards Development and Outreach

VIII.2 Sandia National Laboratories: R&D for Safety, Codes and Standards: Materials and Components Compatibility

VIII.3 Los Alamos National Laboratory: Hydrogen Fuel Quality

VIII.4 Sandia National Laboratories: R&D for Safety, Codes and Standards: Hydrogen Behavior

VIII.5 Sandia National Laboratories: Hydrogen Quantitative Risk Assessment

VIII.6 Pacific Northwest National Laboratory: Hydrogen Safety Panel, Safety Knowledge Tools and First Responder Training Resources

VIII.7 National Renewable Energy Laboratory: NREL Hydrogen Sensor Testing Laboratory

VIII.8 Fuel Cell & Hydrogen Energy Association: Fuel Cell & Hydrogen Energy Association Codes and Standards Support

VIII.9 Pacific Northwest National Laboratory: Compatibility of Polymeric Materials Used in the Hydrogen Infrastructure

VIII.10 Sandia National Laboratories: Enabling Hydrogen Infrastructure through Science-Based Codes and Standards

VIII.11 City and County of San Francisco: Advancing Fuel Cell Vehicles in San Francisco and Beyond

## IX. Systems Analysis

### IX.0 Systems Analysis Sub-Program Overview

IX.1 Argonne National Laboratory: Employment Impacts of Hydrogen and Fuel Cell Technologies

IX.2 Argonne National Laboratory: Regional Water Stress Analysis with Hydrogen Production at Scale

IX.3 Argonne National Laboratory: Cost Benefits Analysis of Technology Improvement in Light-Duty Fuel Cell Vehicles

- IX. Systems Analysis (Continued)
  - IX.4 Sandia National Laboratories: Hydrogen Analysis with the Sandia ParaChoice Model
  - IX.5 National Renewable Energy Laboratory: Sustainability Analysis: Hydrogen Regional Sustainability (HyReS)
  - IX.6 National Renewable Energy Laboratory: Hydrogen Financial Analysis Scenario Tool (H2FAST) Updates with Analysis of 101st Station
  - IX.7 National Renewable Energy Laboratory: Regional Supply of Hydrogen
  - IX.8 Argonne National Laboratory: Greenhouse Gas (GHG) Emissions and Petroleum Use Reduction of Medium- and Heavy-Duty Trucks
  - IX.9 Argonne National Laboratory: Agent-Based Modeling of Consumer Behavior
  - IX.10 Argonne National Laboratory: Life-Cycle Analysis of Air Pollutants Emission for Refinery and Hydrogen Production from SMR
  - IX.11 National Renewable Energy Laboratory: Resource Availability for Hydrogen Production
  - IX.12 Argonne National Laboratory: Benefits Analysis of Multi-Fuel/Vehicle Platforms with a Focus on Hydrogen Fuel Cell Electric Vehicles
- X. Market Transformation
  - X.0 Market Transformation Sub-Program Overview
  - X.1 Hawaii Natural Energy Institute: Hydrogen Energy Systems as a Grid Management Tool
  - X.2 Plug Power: Ground Support Equipment Demonstration
  - X.3 Sandia National Laboratories: Maritime Fuel Cell Generator Project
  - X.4 Pacific Northwest National Laboratory: Demonstration of Fuel Cell Auxiliary Power Unit (APU) to Power Truck Refrigeration Units (TRUs) in Refrigerated Trucks
  - X.5 Federal Express Corporation: FedEx Express Hydrogen Fuel Cell Extended-Range Battery Electric Vehicles
  - X.6 US Hybrid: Northeast Demonstration and Deployment of FCRx200
- XI. Small Business Innovation Research
- XII. Acronyms, Abbreviations, and Definitions
- XIII. Primary Contacts Index
- XIV. Hydrogen and Fuel Cells Program Contacts
- XV. Project Listings by State
- XVI. Project Listings by Organization
