## NOTICE

This work was authored in part by the National Renewable Energy Laboratory, operated by Alliance for Sustainable Energy, LLC, for the U.S. Department of Energy (DOE) under Contract No. DE-AC36-08GO28308. Funding provided by U.S. Department of Energy Office of Energy Efficiency and Renewable Energy Fuel Cell Technologies Office. The views expressed herein do not necessarily represent the views of the DOE or the U.S. Government.

This report is available at no cost from the National Renewable Energy Laboratory (NREL) at [www.nrel.gov/publications](http://www.nrel.gov/publications).

U.S. Department of Energy (DOE) reports produced after 1991 and a growing number of pre-1991 documents are available free via [www.OSTI.gov](http://www.OSTI.gov).

# Outline

## Introduction

## Hydrogen Fuel R&D

- Hydrogen Fuel R&D Subprogram Overview
- Hydrogen Production Analysis
  - Strategic Analysis, Inc.: Analysis of Advanced Hydrogen Production Pathways
- Electrolysis Production
  - Giner, Inc.: High-Temperature Alkaline Water Electrolysis
  - University of Connecticut: HydroGEN Seedling: Proton-Conducting Solid Oxide Electrolysis Cells for Large-Scale Hydrogen Production at Intermediate Temperatures
  - Northwestern University: HydroGEN Seedling: Degradation Characterization and Modeling of a New Solid Oxide Electrolysis Cell Utilizing Accelerated Life Testing
  - United Technologies Research Center: HydroGEN Seedling: Thin-Film, Metal-Supported, High-Performance, and Durable Proton-Solid Oxide Electrolyzer Cell
  - Proton Energy Systems d/b/a Nel Hydrogen: HydroGEN Seedling: High-Efficiency Proton Exchange Membrane Water Electrolysis Enabled by Advanced Catalysts, Membranes, and Processes
  - Northeastern University: HydroGEN Seedling: Developing Novel Platinum-Group-Metal-Free Catalysts for Alkaline Hydrogen and Oxygen Evolution Reactions
  - Argonne National Laboratory: HydroGEN Seedling: Platinum-Group-Metal-Free Oxygen Evolution Reaction Catalysts for Proton Exchange Membrane Electrolyzers
  - Los Alamos National Laboratory: HydroGEN Seedling: High-Performance Ultralow-Cost Non-Precious-Metal Catalyst System for Anion Exchange Membrane Electrolyzer
  - Los Alamos National Laboratory: HydroGEN Seedling: Scalable Elastomeric Membranes for Alkaline Water Electrolysis
  - West Virginia University: HydroGEN Seedling: Intermediate Temperature Proton-Conducting Solid Oxide Electrolysis Cells with Improved Performance and Delivery
  - Saint-Gobain: HydroGEN Seedling: HydroGEN Seedling: Development of Durable Materials for Cost Effective Advanced Water Splitting Utilizing All Ceramic Solid Oxide Electrolyzer Stack Technology
  - FuelCell Energy, Inc.: Proton-Conducting Ceramic Electrolyzers for High-Temperature Water Splitting
  - National Renewable Energy Laboratory: Industrially Scalable Waste CO<sub>2</sub> Reduction to Useful Chemicals and Fuels

- Biological Production
  - Oregon State University: Novel Hybrid Microbial Electrochemical System for Efficient Hydrogen Generation from Biomass
  - National Renewable Energy Laboratory: BioHydrogen (BioH<sub>2</sub>) Consortium to Advance Fermentative Hydrogen Production
- HydroGEN Consortium Overview
  - National Renewable Energy Laboratory: HydroGEN Overview: A Consortium on Advanced Water Splitting Materials
  - Proton Energy Systems d/b/a Nel Hydrogen: HydroGEN: Benchmarking Advanced Water Splitting Technologies: Best Practices in Materials Characterization
- Photoelectrochemical Production
  - Rutgers University: HydroGEN Seedling: Best-in-Class Platinum-Group-Metal-Free Catalyst Integrated Tandem Junction Photoelectrochemical Water Splitting Devices
  - Stanford University: HydroGEN Seedling: Protective Catalyst Systems on III-V and Si-Based Semiconductors for Efficient, Durable Photoelectrochemical Water Splitting Devices
  - University of Hawaii: HydroGEN Seedling: Novel Chalcopyrites For Advanced Photoelectrochemical Water Splitting
  - University of Michigan: HydroGEN Seedling: Monolithically Integrated Thin-Film/Silicon Tandem Photoelectrodes for High-Efficiency and Stable Photoelectrochemical Water Splitting
- High-Temperature Thermochemical
  - Colorado School of Mines: HydroGEN Seedling: Accelerated Discovery of Solar Thermochemical Hydrogen Production Materials via High-Throughput Computational and Experimental Methods
  - University of Colorado Boulder: HydroGEN Seedling: Computationally Accelerated Discovery and Experimental Demonstration of High-Performance Materials for Advanced Solar Thermochemical Hydrogen Production
  - Northwestern University: HydroGEN Seedling: Transformative Materials for High-Efficiency Thermochemical Production of Solar Fuels
  - Arizona State University: HydroGEN Seedling: Mixed Ionic Electronic Conducting Quaternary Perovskites: Materials by Design for Solar Thermochemical Hydrogen
- Testing and Analysis – Storage
  - Argonne National Laboratory: System Analysis of Physical and Materials-Based Hydrogen Storage
  - Strategic Analysis, Inc.: Hydrogen Storage Cost Analysis
- Systems Engineering – Storage
  - National Renewable Energy Laboratory: Hydrogen Storage System Modeling: Public Access, Maintenance, and Enhancements
- Advanced Materials – Storage
  - Sandia National Laboratories and National Renewable Energy Laboratory: HyMARC: A Consortium for Advancing Hydrogen Storage Materials
  - Liox Power: HyMARC Seedling: Electrolyte-Assisted Hydrogen Storage Reactions

- University of Hawaii: HyMARC Seedling: Development of Magnesium Boride Etherates as Hydrogen Storage Materials
- National Renewable Energy Laboratory: HyMARC Seedling: Atomic Layer Deposition Synthesis of Novel Nanostructured Metal Borohydrides
- University of Michigan: HyMARC Seedling: Optimized Hydrogen Adsorbents via Machine Learning and Crystal Engineering
- Advanced Tanks – Storage
  - University of Kentucky Center for Applied Energy Research: Precursor Processing Development for Low-Cost, High-Strength Carbon Fiber for Composite Overwrapped Pressure Vessel Applications
  - Pennsylvania State University: Developing a New Polyolefin Precursor for Low-Cost, High-Strength Carbon Fiber
  - Oak Ridge National Laboratory: Novel Plasticized Melt-Spinning Process of Polyacrylonitrile Fibers Based on Task-Specific Ionic Liquids
  - Pacific Northwest National Laboratory: Material Challenges for Cryogenic Hydrogen Storage Technologies

#### Fuel Cell R&D

- Fuel Cell R&D Subprogram Overview
- Catalysts and Electrodes
  - Argonne National Laboratory: Tailored High-Performance Low-Platinum-Group-Metal Alloy Cathode Catalysts
  - Brookhaven National Laboratory: Platinum Monolayer Electrocatalysts
  - 3M Company: Highly Active, Durable, and Ultra-Low-Platinum-Group-Metal Nanostructured Thin Film Oxygen Reduction Reaction Catalysts and Supports
  - General Motors: Highly Accessible Catalysts for Durable High-Power Performance
  - Washington University in St. Louis: Corrosion-Resistant Non-Carbon Electrocatalyst Supports for Proton Exchange Fuel Cells
  - Los Alamos National Laboratory: Advanced Electrocatalysts Through Crystallographic Enhancement
  - Ford Motor Company: Vapor Deposition Process for Engineering of Dispersed Polymer Electrolyte Membrane Fuel Cell Oxygen Reduction Reaction Pt/NbOx/C Catalysts
  - pH Matter LLC: FY18 SBIR Phase II Release 1: Multi-Functional Catalyst Support<
  - Northeastern University: Developing Platinum-Group-Metal-Free Catalysts for Oxygen Reduction Reaction in Acid: Beyond the Single Metal Site
  - Indiana University Purdue University Indianapolis: Mesoporous Carbon-Based Platinum-Group-Metal-Free Catalyst Membrane Electrode Assemblies
  - Vanderbilt University: Fuel Cell Membrane Electrode Assemblies with Platinum-Group-Metal-Free Nanofiber Cathodes

- Pajarito Powder: Active and Durable Platinum-Group-Metal-Free Cathodic Electrocatalysts for Fuel Cell Application
- United Technologies Research Center: High-Performance Non-Platinum-Group-Metal Transition Metal Oxide Oxygen Reduction Reaction Catalysts of Polymer Electrolyte Membrane Fuel Cells
- Los Alamos National Laboratory: Lab Call FY19: Accessible Platinum-Group-Metal-Free Catalysts and Electrodes: ElectroCat
- Argonne National Laboratory: Lab Call FY19: Polymer Electrolyte Fuel Cell Electrode Structures with Encased Catalysts to Eliminate Ionomer Adsorption on Catalytic Sites
- ElectroCat Consortium
  - Los Alamos National Laboratory and Argonne National Laboratory: ElectroCat (Electrocatalysis Consortium)
  - Giner, Inc.: ElectroCat: Durable Mn-Based Platinum-Group-Metal-Free Catalysts for Polymer Electrolyte Membrane Fuel Cells
  - Carnegie Mellon University: ElectroCat: Advanced Platinum-Group-Metal-Free Cathode Engineering for High Power Density and Durability
  - Pacific Northwest National Laboratory: ElectroCat: Highly Active and Durable Platinum-Group-Metal-Free Oxygen Reduction Reaction Electrocatalysts Through the Synergy of Active Sites
  - Greenway Energy, LLC: ElectroCat: Platinum-Group-Metal-Free Engineered Framework Nano-Structure Catalyst
- Membranes/Electrolytes
  - Los Alamos National Laboratory: Advanced Materials for Fully Integrated Membrane Electrode Assemblies in Anion Exchange Membrane Fuel Cells
  - National Renewable Energy Laboratory: Advanced Ionomers and Membrane Electrode Assemblies for Alkaline Membrane Fuel Cells
  - Argonne National Laboratory: Highly Efficient and Durable Cathode Catalyst with Ultralow Platinum Loading through Synergetic Platinum/Platinum-Group-Metal-Free Catalytic Interaction
  - NanoSonic, Inc.: FY17 SBIR II Release 1: Novel Hydrocarbon Ionomers for Durable Polymer Electrolyte Membranes
  - National Renewable Energy Laboratory: Lab Call FY18 (Membrane): Spirocyclic Anion Exchange Membranes for Improved Performance and Durability
  - Lawrence Berkeley National Laboratory: Lab Call FY18 (Membrane): Stable Alkaline Membrane Based on Proazaphosphatranes Organic Super Base
  - Los Alamos National Laboratory: Lab Call FY18 (Membrane): High Performing and Durable Pyrophosphate-Based Composite Membranes for Intermediate-Temperature Fuel Cells
  - National Renewable Energy Laboratory and Los Alamos National Laboratory: Membrane Working Group

- Rensselaer Polytechnic Institute: Cyclic Olefin Copolymer-Based Alkaline Exchange Polymers and Reinforced Membranes
- Pennsylvania State University: Advanced Anion Exchange Membranes with Tunable Water Transport for Platinum-Group-Metal-Free Anion Exchange Membrane Fuel Cells
- Drexel University: Polymerized Ionic Liquid Block Copolymer/Ionic Liquid Composite Ionomers for High Current Density Performance
- Vanderbilt University: Composite Polymer Electrolyte Membranes from Electrospun Crosslinkable Poly(Phenylene Sulfonic Acid)s
- Xergy Inc.: Novel Non-Perfluorosulfonic Acid Proton Exchange Membrane for Fuel Cell Application
- Lawrence Livermore National Laboratory: Molten Hydroxide Dual-Phase Membranes for Intermediate Temperature Anion Exchange Membrane Fuel Cells
- Sandia National Laboratories: Lab Call FY19: Electrode Ionomers for High Temperature Fuel Cells
- Fuel Cell Performance and Durability
  - Los Alamos National Laboratory: FC-PAD: Fuel Cell Performance and Durability Consortium
  - 3M Company: Novel Ionomers and Electrode Structures for Improved Polymer Electrolyte Membrane Fuel Cell Electrode Performance at Low Platinum-Group-Metal Loadings
  - General Motors: Durable High-Power Membrane Electrode Assemblies with Low Platinum Loading
  - United Technologies Research Center: High-Performance Polymer Electrolyte Membrane Fuel Cell Electrode Structures
  - Vanderbilt University: Fuel Cell Membrane Electrode Assemblies with Ultra-Low-Platinum Nanofiber Electrodes
- MEAs, Cells, and Other Stack Components
  - TreadStone Technologies, Inc.: Novel Structured Metal Bipolar Plates for Low-Cost Manufacturing
  - Giner, Inc.: FY18 SBIR IIB: Ionomer Dispersion Impact on Advanced Fuel Cell and Electrolyzer Performance and Durability
  - Advent Technologies, Inc.: Facilitated Direct Liquid Fuel Cells with High-Temperature Membrane Electrode Assemblies
  - Los Alamos National Laboratory: Lab Call FY18 (Reversible Fuel Cell): Microstructured Electrodes and Diffusion Layers for Enhanced Transport in Reversible Fuel Cells
  - National Renewable Energy Laboratory: Lab Call FY18 (Reversible Fuel Cell): Bipolar Membrane Development to Enable Regenerative Fuel Cells
  - Lawrence Berkeley National Laboratory: Lab Call FY18 (Reversible Fuel Cell): Technology-Enabling Materials, Cell Design for Reversible Proton Exchange Membrane Fuel Cells

- Lawrence Berkeley National Laboratory: Novel Bifunctional Electrocatalysts, Supports, and Membranes for High Performing and Durable Unitized Regenerative Fuel Cells
- Northwestern University: Efficient Reversible Operation and Stability of Novel Solid Oxide Cells
- Giner, Inc.: High-Efficiency Reversible Alkaline Membrane Fuel Cells
- Georgia Institute of Technology: Durable, High-Performance Unitized Reversible Fuel Cells Based on Proton Conductors
- University of Kansas: Stationary Direct Methanol Fuel Cells Using Pure Methanol
- Los Alamos National Laboratory: Lab Call FY19: Low-Cost Gas Diffusion Layer Materials and Treatments for Durable High-Performance Polymer Electrolyte Membrane Fuel Cells
- Pacific Northwest National Laboratory: Lab Call FY19: Solid Phase Processing for Reduced Cost and Improved Efficiency of Bipolar Plates
- Testing and Technical Assessment
  - Argonne National Laboratory: Performance and Durability of Advanced Automotive Fuel Cell Stacks and Systems with State-of-the-Art d-PtCo/C Cathode Catalyst in Membrane Electrode Assemblies
  - Strategic Analysis, Inc.: Fuel Cell Systems Analysis

#### Infrastructure and Systems R&D

- Infrastructure and Systems R&D Overview
- Hydrogen Infrastructure R&D
  - Sandia National Laboratories: H-Mat Overview: Steels
  - Southwest Research Institute: Hydrogen Compression Application of the Linear Motor Reciprocating Compressor
  - Pacific Northwest National Laboratory: Magnetocaloric Hydrogen Liquefaction
  - Giner ELX, Inc.: Electrochemical Compression
  - Sandia National Laboratories: Metal Hydride Compression
  - National Renewable Energy Laboratory: Dispenser Reliability
  - Ivys Energy Solutions: Advancing Hydrogen Dispenser Technology by Using Innovative Intelligent Networks
  - NanoSonic, Inc.: Cryogenically Flexible, Low-Permeability Hydrogen Delivery Hose
  - GVD Corporation: Coatings for Compressor Seals
  - General Engineering & Research, LLC: Low-Cost Magnetocaloric Materials Discovery
- Technology Acceleration
  - National Renewable Energy Laboratory: Membrane Electrode Assembly Manufacturing R&D
  - Mainstream Engineering: In-Line Quality Control of Polymer Electrolyte Membrane Materials
  - National Renewable Energy Laboratory: Material-Process-Performance Relationships in Polymer Electrolyte Membrane Catalyst Inks and Coated Layers

- Sandia National Laboratories: Maritime Fuel Cell Generator Project
- National Renewable Energy Laboratory: Fuel Cell Bus Evaluations
- National Renewable Energy Laboratory: Hydrogen Station Data Collection and Analysis
- Idaho National Laboratory: Dynamic Modeling and Validation of Electrolyzers in Real-Time Grid Simulation
- Center for Transportation and the Environment: Fuel Cell Hybrid Electric Delivery Van
- Electricore, Inc.: Innovative Advanced Hydrogen Mobile Fueler
- Idaho National Laboratory: High-Temperature Electrolysis Test Stand
- FuelCell Energy, Inc.: Modular Solid Oxide Electrolysis Cell System for Efficient Hydrogen Production at High Current Density
- National Renewable Energy Laboratory: Optimal Stationary Fuel Cell Integration and Control (Energy Dispatch Controller)
- Lawrence Berkeley National Laboratory: Integrated Systems Modeling of the Interactions between Stationary Hydrogen, Vehicles, and Grid Resources
- National Renewable Energy Laboratory: H2@Scale: Experimental Characterization of Durability of Advanced Electrolyzer Concepts in Dynamic Loading
- Sandia National Laboratories: Hydrogen Stations for Urban Sites
- Argonne National Laboratory: Analysis of Fuel Cells for Trucks
- Clemson University: Laser 3-D Printing of Highly Compacted Protonic Ceramic Electrolyzer Stack
- 3M Company: Low-Cost, High-Performance Catalyst Coated Membranes for Proton Exchange Membrane Water Electrolyzers
- Systems Analysis
  - Argonne National Laboratory: Cost Benefit Analysis of Technology Improvements in Medium- and Heavy-Duty Fuel Cell Vehicles
  - National Renewable Energy Laboratory: Market Segmentation Analysis of Medium- and Heavy-Duty Trucks with a Fuel Cell Emphasis
  - Argonne National Laboratory: Analysis of Cost Impacts of Integrating Advanced On-Board Storage Systems with Hydrogen Delivery
  - National Renewable Energy Laboratory: H2@Scale Analysis
  - Argonne National Laboratory: Hydrogen Demand Analysis for H2@Scale
  - National Renewable Energy Laboratory: Energy Storage Analysis

#### Safety, Codes and Standards

- Safety, Codes and Standards Subprogram Overview
  - Sandia National Laboratories: R&D for Safety, Codes and Standards: Materials and Components Compatibility

- Los Alamos National Laboratory: Fuel Quality Assurance Research and Development and Impurity Testing in Support of Codes and Standards
- Sandia National Laboratories: R&D for Safety, Codes and Standards: Hydrogen Behavior
- Sandia National Laboratories: Hydrogen Quantitative Risk Assessment
- Pacific Northwest National Laboratory: Hydrogen Safety Panel, Safety Knowledge Tools, and First Responder Training Resources
- National Renewable Energy Laboratory: NREL Hydrogen Sensor Testing Laboratory
- Pacific Northwest National Laboratory: H-Mat Overview: Polymers
