

Table of Contents

Introduction	1
Hydrogen Fuel R&D	8
Hydrogen Production and Delivery R&D	10
PD-025: Fatigue Performance of High-Strength Pipeline Steels and Their Welds in Hydrogen Gas Service	10
PD-100: 700 bar Hydrogen Dispenser Hose Reliability Improvement.....	14
PD-108: Hydrogen Compression Application of the Linear Motor Reciprocating Compressor	17
PD-131: Magnetocaloric Hydrogen Liquefaction	20
PD-135: Liquid Hydrogen Infrastructure Analysis.....	24
PD-136: Electrochemical Compression	27
PD-137: Hybrid Electrochemical–Metal Hydride Compression	30
PD-138: Metal Hydride Compression	33
PD-140: Dispenser Reliability	36
PD-143: High-Temperature Alkaline Water Electrolysis	39
PD-146: Advancing Hydrogen Dispenser Technology by Using Innovative Intelligent Networks.....	43
PD-149: Hydrogen Dispensing Hose.....	46
PD-150: Coatings for Compressor Seals.....	50
PD-151: New Approaches to Improved Polymer Electrolyte Membrane Electrolyzer Ion-Exchange Membranes.....	53
Hydrogen Production and Delivery R&D: HydroGEN Seedling	57
PD-148: HydroGEN Overview: A Consortium on Advanced Water-Splitting Materials	57
PD-152: Proton-Conducting Solid Oxide Electrolysis Cells for Large-Scale Hydrogen Production at Intermediate Temperatures	61
PD-153: Degradation Characterization and Modeling of a New Solid Oxide Electrolysis Cell Utilizing Accelerated Life Testing	65
PD-154: Thin-Film, Metal-Supported High-Performance and Durable Proton–Solid Oxide Electrolyzer Cell.....	68
PD-155: High-Efficiency Polymer Electrolyte Membrane Water Electrolysis Enabled by Advanced Catalysts, Membranes, and Processes	71
PD-156: Developing Novel Platinum-Group-Metal-Free Catalysts for Alkaline Hydrogen and Oxygen Evolution Reactions	75
PD-157: Platinum-Group-Metal-Free Oxygen Evolution Reaction Catalysts for Polymer Electrolyte Membrane Electrolyzer	78
PD-158: High-Performance Ultralow-Cost Non-Precious-Metal Catalyst System for Anion-Exchange Membrane Electrolyzer.....	81
PD-159: Scalable Elastomeric Membranes for Alkaline Water Electrolysis	84
PD-160: Best-in-Class Platinum-Group-Metal-Free Catalyst Integrated Tandem Junction Photoelectrochemical Water-Splitting Devices	87
PD-161: Protective Catalyst Systems on III-V and Silicon-Based Semiconductors for Efficient, Durable Photoelectrochemical Water-Splitting Devices	90

PD-162:	Novel Chalcopyrites For Advanced Photoelectrochemical Water Splitting	94
PD-163:	Monolithically Integrated Thin-Film/Silicon Tandem Photoelectrodes for High-Efficiency and Stable Photoelectrochemical Water Splitting.....	98
PD-164:	Efficient Solar Water Splitting with 5,000-Hour Stability Using Earth-Abundant Catalysts and Durable Layered Two-Dimensional Perovskites.....	101
PD-165:	Accelerated Discovery of Solar Thermochemical Hydrogen Production Materials via High-Throughput Computational and Experimental Methods.....	104
PD-166:	Computationally Accelerated Discovery and Experimental Demonstration of High-Performance Materials for Advanced Solar Thermochemical Hydrogen Production	107
PD-167:	Transformative Materials for High-Efficiency Thermochemical Production of Solar Fuels	110
PD-168:	Mixed Ionic Electronic Conducting Quaternary Perovskites: Materials by Design for Solar Thermochemical Hydrogen	113
PD-169:	High-Temperature Reactor Catalyst Material Development for Low-Cost and Efficient Solar-Driven Sulfur-Based Processes	115
Hydrogen Storage R&D		119
ST-001:	System-Level Analysis of Hydrogen Storage Options	119
ST-008:	Hydrogen Storage System Modeling: Public Access, Maintenance, and Enhancements.....	124
ST-100:	Hydrogen Storage Cost Analysis.....	128
ST-122:	Hydrogen Adsorbents with High Volumetric Density: New Materials and System Ions.....	133
ST-127:	Hydrogen Materials—Advanced Research Consortium (HyMARC): A Consortium for Advancing Hydrogen Storage Materials	137
ST-128:	Hydrogen Materials—Advanced Research Consortium (HyMARC): Sandia National Laboratories Technical Activities	143
ST-129:	Hydrogen Materials—Advanced Research Consortium (HyMARC): Lawrence Livermore National Laboratory Technical Activities.....	148
ST-130:	Hydrogen Materials—Advanced Research Consortium (HyMARC): Lawrence Berkeley National Laboratory Technical Activities.....	153
ST-131:	Hydrogen Materials—Advanced Research Consortium (HyMARC): National Renewable Energy Laboratory Technical Activities	157
ST-132:	Hydrogen Materials—Advanced Research Consortium (HyMARC): Pacific Northwest National Laboratory Technical Activities.....	161
ST-133:	Hydrogen Materials—Advanced Research Consortium (HyMARC): Lawrence Berkeley National Laboratory Technical Activities.....	165
ST-138:	Hydrogen Materials—Advanced Research Consortium (HyMARC) Seedling: Development of Magnesium Boride Etherates as Hydrogen Storage Materials	169
Fuel Cell R&D		173
FC-017:	Fuel Cell System Modeling and Analysis	175
FC-117:	Fiscal Year 2015 Small Business Innovation Research (Phase II Release 2): Ionomer Dispersion Impact on Polymer Electrolyte Membrane Fuel Cell and Electrolyzer Durability.....	180
FC-128:	Facilitated Direct Liquid Fuel Cells with High-Temperature Membrane Electrode Assemblies	185
FC-135:	Fuel Cell Consortium for Performance and Durability	190
FC-140:	Tailored High-Performance Low-Platinum-Group-Metal Alloy Cathode Catalysts	196

FC-141:	Platinum Monolayer Electrocatalysts.....	202
FC-142:	Extended Surface Electrocatalyst Development	205
FC-143:	Highly Active, Durable, and Ultralow-Platinum-Group-Metal Nanostructured Thin-Film Oxygen Reduction Reaction Catalysts and Supports.....	210
FC-144:	Highly Accessible Catalysts for Durable High-Power Performance	215
FC-145:	Corrosion-Resistant Non-Carbon Electrocatalyst Supports for Proton Exchange Fuel Cells.....	219
FC-146:	Advanced Materials for Fully Integrated Membrane Electrode Assemblies in Anion-Exchange Membrane Fuel Cells	224
FC-147:	Advanced Ionomers and Membrane Electrode Assemblies for Alkaline Membrane Fuel Cells.....	229
FC-154:	Fiscal Year 2016 Small Business Innovation Research (Phase II Release 1): Regenerative Fuel Cell System	234
FC-155:	Novel Ionomers and Electrode Structures for Improved Polymer Electrolyte Membrane Fuel Cell Electrode Performance at Low-Platinum-Group-Metal Loadings	239
FC-156:	Durable High-Power Membrane Electrode Assemblies with Low Platinum Loading.....	245
FC-157:	High-Performance Polymer Electrolyte Fuel Cell Electrode Structures.....	250
FC-158:	Fuel Cell Membrane Electrode Assemblies with Ultralow-Platinum Nanofiber Electrodes.....	255
FC-160:	ElectroCat (Electrocatalysis Consortium)	259
FC-161:	Advanced Electrocatalysts through Crystallographic Enhancement	263
FC-162:	Vapor Deposition Process for Engineering of Dispersed Polymer Electrolyte Membrane Fuel Cell Oxygen Reduction Reaction Pt/NbOx/C Catalysts	267
FC-163:	Fuel Cell Systems Analysis	273
FC-170:	ElectroCat: Durable Manganese-Based Platinum-Group-Metal-Free Catalysts for Polymer Electrolyte Membrane Fuel Cells	279
FC-171:	ElectroCat: Advanced Platinum-Group-Metal-Free Cathode Engineering for High Power Density and Durability	285
FC-172:	ElectroCat: Highly Active and Durable Platinum-Group-Metal-Free Oxygen Reduction Reaction Electrocatalysts through the Synergy of Active Sites	290
FC-173:	ElectroCat: Platinum-Group-Metal-Free Engineered Framework Nanostructure Catalysts	295
FC-174:	Highly Efficient and Durable Cathode Catalyst with Ultralow Platinum Loading through Synergetic Platinum/Platinum-Group-Metal-Free Catalytic Interaction	300
FC-175:	Polymer-Based Fuel Cells That Operate from 80°C–220°C.....	305
FC-176:	Fiscal Year 2017 Small Business Innovation Research (Phase II Release 1): Novel Hydrocarbon Ionomers for Durable Polymer Electrolyte Membranes	309
Technology Acceleration and Hydrogen Infrastructure R&D		314
MN-001:	Fuel Cell Membrane Electrode Assembly Manufacturing Research and Development	316
MN-015:	Continuous Fiber Composite Electrofusion Coupler.....	321
MN-016:	In-Line Quality Control of Polymer Electrolyte Membrane Materials	325
MN-017:	Manufacturing Competitiveness Analysis for Hydrogen Refueling Stations.....	328
MN-018:	Roll-to-Roll Advanced Materials Manufacturing Lab Consortium	333
MT-008:	Hydrogen Energy Systems as a Grid Management Tool	338

MT-011: Fuel-Cell-Powered Airport Ground Support Equipment Deployment 341

MT-013: Maritime Fuel Cell Generator Project 344

MT-014: Demonstration of Fuel Cell Auxiliary Power Unit to Power Truck Refrigeration Units in Refrigerated Trucks 347

MT-017: FedEx Express Hydrogen Fuel Cell Extended-Range Battery Electric Vehicles..... 350

MT-021: Northeast Demonstration and Deployment of FCRx200 354

TV-001: Fuel Cell Electric Vehicle Evaluation 358

TV-008: Fuel Cell Bus Evaluations..... 362

TV-017: Hydrogen Station Data Collection and Analysis 367

TV-029: Performance and Durability Testing of Volumetrically Efficient Cryogenic Vessels and High-Pressure Liquid Hydrogen Pump 371

TV-031: Dynamic Modeling and Validation of Electrolyzers in Real-Time Grid Simulation..... 375

TV-034: Fuel Cell Hybrid Electric Delivery Van..... 379

TV-039: Innovative Advanced Hydrogen Mobile Fueler 383

TV-040: High-Temperature Electrolysis Test Stand..... 387

TV-041: Modular Solid Oxide Electrolyzer Cell System for Efficient Hydrogen Production at High Current Density 390

TV-042: Optimal Stationary Fuel Cell Integration and Control (Energy Dispatch Controller)..... 393

TV-043: Integrated Systems Modeling of the Interactions between Stationary Hydrogen, Vehicle, and Grid Resources..... 396

TV-045: H2@Scale Analysis 401

TV-146: H2@Scale: Experimental Characterization of Durability of Advanced Electrolyzer Concepts in Dynamic Loading 407

TV-148: Hydrogen Stations for Urban Sites 410

TV-149: Mirai Testing 413

TV-150: Analysis of Fuel Cells for Trucks 416

Safety, Codes and Standards.....419

SCS-001: National Codes and Standards Deployment and Outreach..... 421

SCS-005: Research and Development for Safety, Codes and Standards: Materials and Component Compatibility 425

SCS-007: Fuel Quality Assurance Research and Development and Impurity Testing in Support of Codes and Standards 428

SCS-010: Research and Development for Safety, Codes and Standards: Hydrogen Behavior 432

SCS-011: Hydrogen Quantitative Risk Assessment 437

SCS-019: Hydrogen Safety Panel, Safety Knowledge Tools, and First Responder Training Resources 440

SCS-021: National Renewable Energy Laboratory Hydrogen Sensor Testing Laboratory 445

SCS-025: Enabling Hydrogen Infrastructure through Science-Based Codes and Standards..... 449

SCS-026: Compatibility of Polymeric Materials Used in the Hydrogen Infrastructure..... 453

SCS-030: Advancing Fuel Cell Electric Vehicles in San Francisco and Beyond 458

Systems Analysis462

SA-039: Regional Water Stress Analysis with Hydrogen Production at Scale 464

SA-044:	Cost–Benefit Analysis of Technology Improvement in Light-Duty Fuel Cell Vehicles	467
SA-059:	Sustainability Analysis: Hydrogen Regional Sustainability	470
SA-063:	Regional Supply of Hydrogen	473
SA-169:	Market Segmentation Analysis of Medium- and Heavy-Duty Trucks with a Fuel Cell Emphasis	476
SA-170:	Analysis of Cost Impacts of Integrating Advanced Onboard Storage Systems with Hydrogen Delivery	479
Appendix A: Program and Sub-Program Review Comments		483
Appendix B: Attendee List		498
Appendix C: Evaluation Forms		525
Appendix D: Projects Not Reviewed.....		543
