

Table of Contents

Introduction	1
Organization of the Report.....	1
Overview of the DOE Hydrogen Program.....	2
Background: H2@Scale – A Guiding Framework	3
Program Highlights.....	4
Office Overviews and Updates	8
In Closing.....	13
Peer Review Introduction/Methodology	13
Analysis Methodology.....	15
Hydrogen Technologies – 2021	19
Subprogram Overview.....	19
Annual Merit Review of the Hydrogen Technologies Subprogram	29
Project Reviews.....	31
Production	31
Project #P-148: HydroGEN Overview: A Consortium on Advanced Water-Splitting Materials	31
Project #P-179: BioHydrogen (BioH ₂) Consortium to Advance Fermentative Hydrogen Production.....	36
Project #P-182: Binary Chloride Salts as Catalysts for Methane to Hydrogen and Graphitic Powder.....	41
Project #P-183: Extremely Durable Concrete Using Methane Decarbonization Nanofiber Co-Products with Hydrogen	46
Project #P-184: Scalable and Highly Efficient Microbial Electrochemical Reactor for Hydrogen Generation from Lignocellulosic Biomass and Waste.....	51
Project #P-196: H ₂ NEW Consortium: Hydrogen from Next-Generation Electrolyzers of Water	56
Production—HydroGEN Seedling.....	61
Project #P-185: High-Performance Alkaline Electrolyte Membrane Low-Temperature Electrolysis with Advanced Membranes, Ionomers, and Platinum-Group-Metal-Free Electrodes.....	61
Project #P-186: Performance and Durability Investigation of Thin, Low-Crossover Proton Exchange Membranes for Water Electrolyzers.....	66
Project #P-187: Pure Hydrogen Production through Precious-Metal-Free Membrane Electrolysis of Dirty Water.....	70

Project #P-188: Advanced Coatings to Enhance the Durability of Solid Oxide Electrolysis Cell Stacks.....	75
Project #P-189: Scalable High-Hydrogen-Flux, Robust Thin Film Solid Oxide Electrolyzer	80
Project #P-190: A Multifunctional Isostructural Bilayer Oxygen Evolution Electrode for Durable Intermediate-Temperature Electrochemical Water Splitting	84
Project #P-191: Perovskite–Perovskite Tandem Photoelectrodes for Low-Cost Unassisted Photoelectrochemical Water Splitting.....	88
Project #P-192: Development of Composite Photocatalyst Materials That Are Highly Selective for Solar Hydrogen Production and Their Evaluation in Z-Scheme Reactor Designs	91
Project #P-193: Highly Efficient Solar Water Splitting Using Three-Dimensional/Two-Dimensional Hydrophobic Perovskites with Corrosion-Resistant Barriers	94
Project #P-194: New High-Entropy Perovskite Oxides with Increased Reducibility and Stability for Thermochemical Hydrogen Generation	97
Project #P-195: A New Paradigm for Materials Discovery and Development for Lower-Temperature and Isothermal Thermochemical Hydrogen Production	103
Infrastructure	107
Project #H2-061: Innovating Hydrogen Stations: Heavy-Duty Fueling.....	107
Project #IN-001a: Hydrogen Materials Compatibility Consortium (H-Mat) Overview: Metals.....	111
Project #IN-001b: Hydrogen Materials Compatibility Consortium (H-Mat) Overview: Polymers ...	115
Project #IN-004: Magnetocaloric Hydrogen Liquefaction	119
Project #IN-015: Optimizing the Heisenberg Vortex Tube for Hydrogen Cooling	122
Project #IN-016: Free-Piston Expander for Hydrogen Cooling	126
Project #IN-019: Ultra-Cryopump for High-Demand Transportation Fueling	129
Project #IN-020: Self-Healable Copolymer Composites for Extended-Service Hydrogen Dispensing Hoses	132
Project #IN-021: Microstructural Engineering and Accelerated Test Method Development to Achieve Low-Cost, High-Performance Solutions for Hydrogen Storage and Delivery.....	137
Project #IN-022: Tailoring Carbide-Dispersed Steels: A Path to Increased Strength and Hydrogen Tolerance	141
Project #IN-025: Hydrogen Delivery Technologies Analysis	147
Project #IN-026: Tailoring Composition and Deformation Modes at the Microstructural Level for Next-Generation Low-Cost, High-Strength Austenitic Stainless Steels	152
Project #IN-029: Reducing the Cost of Fatigue Crack Growth Testing for Storage Vessel Steels in Hydrogen Gas	156
Project #IN-030: Micro-Mechanically Guided High-Throughput Alloy Design Exploration toward Metastability-Induced Hydrogen Embrittlement Resistance	159
Storage	163
Project #ST-001: System-Level Analysis of Hydrogen Storage Options.....	163
Project #ST-100: Hydrogen Storage Cost Analysis	167
Project #ST-127: Hydrogen Materials–Advanced Research Consortium (HyMARC) Overview ...	171

Project #ST-209: Hydrogen Materials–Advanced Research Consortium (HyMARC) Seedling: Theory-Guided Design and Discovery of Materials for Reversible Methane and Hydrogen Storage	176
Project #ST-211: Hydrogen Materials–Advanced Research Consortium (HyMARC) Seedling: Optimal Adsorbents for Low-Cost Storage of Natural Gas and Hydrogen: Computational Identification, Experimental Demonstration, and System-Level Projection	180
Project #ST-212: Hydrogen Materials–Advanced Research Consortium (HyMARC) Seedling: Methane and Hydrogen Storage with Porous Cage-Based Composite Materials	184
Project #ST-214: Hydrogen Materials–Advanced Research Consortium (HyMARC) Seedling: Heteroatom-Modified and Compacted Zeolite-Templated Carbons for Gas Storage	187
Project #ST-215: Hydrogen Materials–Advanced Research Consortium (HyMARC) Seedling: Developing A New Natural Gas Super-Absorbent Polymer	191
Project #ST-216: Hydrogen Materials–Advanced Research Consortium (HyMARC) Seedling: Hydrogen Release from Concentrated Media with Reusable Catalysts	195
Project #ST-217: Hydrogen Materials–Advanced Research Consortium (HyMARC) Seedling: A Reversible Liquid Hydrogen Carrier System Based on Ammonium Formate and Captured Carbon Dioxide	198
Project #ST-218: Hydrogen Materials–Advanced Research Consortium (HyMARC) Seedling: High-Capacity, Step-Shaped Hydrogen Adsorption in Robust, Pore-Gating Zeolitic Imidazolate Frameworks	201
Project #ST-223: Cost Assessment and Evaluation of Liquid Hydrogen Storage for Medium- and Heavy-Duty Transportation Applications	206
Project #ST-227: Integrated Onsite Waste-Heat-Driven Hydrogen Carrier System for Steel and Renewables	209
Project #ST-228: Determining the Value Proposition of Materials-Based Hydrogen Storage for Stationary Bulk Storage of Hydrogen	213
Fuel Cell Technologies – 2021	217
Subprogram Overview.....	217
Annual Merit Review of the Fuel Cell Technologies Subprogram.....	223
Project Reviews.....	225
Project #FC-117: Fiscal Year 2018 Small Business Innovation Research Phase IIB: Ionomer Dispersion Impact on Advanced Fuel Cell Performance and Durability.....	225
Project #FC-158: Fuel Cell Membrane Electrode Assemblies with Ultra-Low-Platinum Nanofiber Electrodes	230
Project #FC-160: ElectroCat 2.0 (Electrocatalysis Consortium)	235
Project #FC-163: Fuel Cell Systems Analysis	240
Project #FC-167: Fiscal Year 2020 Small Business Innovation Research Phase IIA: Multi-Functional Catalyst Support.....	245
Project #FC-170: ElectroCat: Durable Manganese-Based Platinum-Group-Metal-Free Catalysts for Polymer Electrolyte Membrane Fuel Cells	248
Project #FC-172: ElectroCat: Highly Active and Durable Platinum-Group-Metal-Free Oxygen Reduction Reaction Electrocatalysts through the Synergy of Active Sites	252

Project #FC-302: ElectroCat: Developing Platinum-Group-Metal-Free Catalysts for Oxygen Reduction Reaction in Acid: Beyond the Single Metal Site	257
Project #FC-303: ElectroCat: Mesoporous Carbon-Based Platinum-Group-Metal-Free Catalyst Cathodes	262
Project #FC-305: Active and Durable Platinum-Group-Metal-Free Cathodic Electrocatalysts for Fuel Cell Application	266
Project #FC-307: Cyclic Olefin Copolymer-Based Alkaline Exchange Polymers and Reinforced Membranes	271
Project #FC-308: Advanced Anion Exchange Membranes with Tunable Water Transport for Platinum-Group-Metal-Free Anion Exchange Membrane Fuel Cells	275
Project #FC-309: Polymerized Ionic Liquid Block Copolymer/Ionic Liquid Composite Ionomers for High-Current-Density Performance	278
Project #FC-310: Composite Polymer Electrolyte Membranes from Electrospun Crosslinkable Poly(Phenylene Sulfonic Acid)s	283
Project #FC-313: Novel Bifunctional Electrocatalysts, Supports, and Membranes for High-Performing and Durable Unitized Regenerative Fuel Cells	288
Project #FC-314: Efficient Reversible Operation and Stability of Novel Solid Oxide Cells	292
Project #FC-316: Durable, High-Performance Unitized Reversible Fuel Cells Based on Proton Conductors	296
Project #FC-317: Stationary Direct Methanol Fuel Cells Using Pure Methanol	300
Project #FC-319: Low-Cost Gas Diffusion Layer Materials and Treatments for Durable High-Performance Polymer Electrolyte Membrane Fuel Cells	305
Project #FC-320: Electrode Ionomers for High-Temperature Fuel Cells	310
Project #FC-323: Durable Fuel Cell Membrane Electrode Assembly through Immobilization of Catalyst Particle and Membrane Chemical Stabilizer	315
Project #FC-324: Reversible Fuel Cell Stacks with Integrated Water Management	319
Project #FC-325: Fiscal Year 2019 Small Business Innovation Research Phase II: Controlled Porosity and Surface Coatings for Advanced Gas Diffusion Layers	323
Project #FC-326: Durable Membrane Electrode Assemblies for Heavy-Duty Fuel Cell Electric Trucks	328
Project #FC-327: Durable High-Power-Density Fuel Cell Cathodes for Heavy-Duty Vehicles	332
Project #FC-328: Fiscal Year 2019 Small Business Innovation Research Phase II: Novel Fluorinated Ionomer for Polymer Electrolyte Membrane Fuel Cells	336
Project #FC-330: High-Efficiency Reversible Solid Oxide System	340
Project #FC-331: A Novel Stack Approach to Enable High Round-Trip Efficiencies in Unitized Polymer Electrolyte Membrane Regenerative Fuel Cells	344
Project #FC-333: Advanced Membranes for Heavy-Duty Fuel Cell Trucks	348
Project #FC-334: Extending Perfluorosulfonic Acid Membrane Durability through Enhanced Ionomer Backbone Stability	352
Project #FC-335: Additive Functionalized Polymers for Extended Heavy-Duty Polymer Electrolyte Membrane Lifetimes	357
Project #FC-336: A Systematic Approach to Developing Durable Conductive Membranes for Operation at 120°C	361

Project #FC-337: Cummins Polymer Electrolyte Membrane Fuel Cell System for Heavy-Duty Applications.....	367
Project #FC-338: Domestically Manufactured Fuel Cells for Heavy-Duty Applications	372
Project #FC-339: M2FCT: Million Mile Fuel Cell Truck Consortium.....	377
Project #FC-341: Advanced Anion Exchange Membrane Fuel Cells through Material Innovation	382
Project #FC-342: Advanced Ionomers and Membrane Electrode Assemblies for Alkaline Membrane Fuel Cells	387
Project #FC-343: Fiscal Year 2020 Small Business Innovation Research Phase II: Improved Ionomers and Membranes for Fuel Cells	391
Technology Acceleration – 2021	396
Subprogram Overview.....	396
Annual Merit Review of the Technology Acceleration Subprogram	402
Project Reviews.....	403
Project #TA-001: Membrane Electrode Assembly Manufacturing Research and Development ...	403
Project #TA-005: In-Line Quality Control of Polymer Electrolyte Membrane Materials.....	407
Project #TA-007: Roll-to-Roll Advanced Materials Manufacturing Lab Collaboration.....	411
Project #TA-009: Maritime (Pierside Power) Fuel Cell Generator Project.....	415
Project #TA-016: Fuel Cell Hybrid Electric Delivery Van.....	420
Project #TA-017: Innovative Advanced Hydrogen Mobile Fueler	425
Project #TA-018: High-Temperature Electrolysis Test Stand	429
Project #TA-024: Analysis of Fuel Cells for Trucks: Real-World Benefits	434
Project #TA-025: Laser Three-Dimensional Printing of Highly Compacted Protonic Ceramic Electrolyzer Stack.....	438
Project #TA-026: Low-Cost, High-Performance Catalyst-Coated Membranes for Polymer Electrolyte Membrane Water Electrolyzers	442
Project #TA-027: Catalyst Layer Design, Manufacturing, and In-Line Quality Control	445
Project #TA-028: Demonstration of Electrolyzer Operation at a Nuclear Plant to Allow for Dynamic Participation in an Organized Electricity Market and In-House Hydrogen Supply.....	451
Project #TA-030: Demonstration of Integrated Hydrogen Production and Consumption for Improved Utility Operations.....	456
Project #TA-032: Electrolyzer Integrated Modular Nano-Array Monolithic Catalytic Reactors.....	460
Project #TA-033: Developing Novel Electrodes with Ultralow Catalyst Loading for High-Efficiency Hydrogen Production in Proton Exchange Membrane Electrolyzer Cells	466
Project #TA-034: Rail, Aviation, and Maritime Metrics	469
Project #TA-035: Power Converter for Electrolyzer Applications.....	473
Project #TA-036: Advanced Electrode Manufacture to Enable Low-Cost Polymer Electrolyte Membrane Electrolysis	477
Project #TA-037: Demonstration and Framework for H2@Scale in Texas and Beyond.....	480

Project #TA-041: Truck Duty Cycle Analysis	485
Project #TA-042: Next-Generation Hydrogen Station Analysis	488
Project #TA-043: Electrolyzer Stack Development and Manufacturing.....	491
Project #TA-047: Rail Refueling Analysis	496
Project #TA-048: Advanced Research on Integrated Energy Systems (ARIES)/Flatirons Facility – Hydrogen System Capability Buildout	501
Project #TA-049: High-Pressure, High-Flow-Rate Dispenser and Nozzle Assembly for Heavy-Duty Vehicles	505
Project #TA-050: Overall Research on Electrode Coating Processes (OREO).....	509
Safety, Codes and Standards – 2021	514
Overview.....	514
Annual Merit Review of the Safety, Codes and Standards Activity	517
Project Reviews.....	519
Project #SCS-005: Research and Development for Safety, Codes and Standards: Material and Component Compatibility.....	519
Project #SCS-007: Fuel Quality Assurance Research and Development and Impurity Testing in Support of Codes and Standards.....	523
Project #SCS-010: Research and Development for Safety, Codes and Standards: Hydrogen Behavior.....	527
Project #SCS-011: Hydrogen Quantitative Risk Assessment.....	532
Project #SCS-019: Hydrogen Safety Panel, Safety Knowledge Tools, and First Responder Training Resources.....	536
Project #SCS-021: Hydrogen Sensor Testing Laboratory	540
Project #SCS-022: Fuel Cell and Hydrogen Energy Association Codes and Standards Support .	545
Project #SCS-029: Point-of-Use Hydrogen Purification and Impurity Reporting Systems that Utilize Metal–Organic Frameworks.....	549
Systems Analysis – 2021	552
Subprogram Overview.....	552
Annual Merit Review of the Systems Analysis Subprogram.....	556
Project Reviews.....	558
Project #SA-169: Market Segmentation Analysis of Medium- and Heavy-Duty Trucks with a Fuel Cell Emphasis	558
Project #SA-174: Technoeconomic and Lifecycle Analysis of Synthetic Fuels and Steelmaking .	562
Project #SA-175: Regional Hybrid Energy Systems Technoeconomic Analysis	565
Project #SA-176: Annual Technology Baseline – Transportation	568

Project #SA-177: Analysis of Hydrogen Export Potential 572

Project #SA-178: Cradle-to-Grave Transportation Analysis 575

Project #SA-179: Transportation Benefits Analysis..... 579

Project #SA-180: Advanced Network Analysis of Hydrogen Fuel Cell Automated Vehicles
for Goods Delivery (ATLAS) – Total Cost of Ownership of Autonomous Fuel Cell Fleet
Vehicles 584

Appendix A: Program Review Summary.....588

Appendix B: Attendee List606

Appendix C: Project Evaluation Forms669

Appendix D: Projects Not Reviewed690
